महोदय

Kindly refer to the letters mentioned above. A report on "Marking on Ground & Map Preparation of Coal Block Boundary of Gare Palma Sector-II of M/s. Mahagenco in Raigarh District, Chattisgarh" along with related plan was submitted vide letter No. CMPDI/BD/C(900)/262 dated 07.06.2016 against the work order placed by M/s. Mahagenco vide No. Mahagenco/ED/(Fuel/Coal)/44 dated 15.02.2016. The above report was prepared based on the plan in coal grid submitted by M/s. Mahagenco to CMPDI. There was a very minor deviation in the coordinate of the cardinal points available with MoC vis-à-vis mentioned in the report based on DGPS survey.

A revised report along with the map is enclosed for further necessary action at your end.

## Report on marking of Gare Palma Sector-II Coal Block boundary on ground and preparation of map

### 1.0 Introduction

M/s. Maharashtra State Power Generation Company Limited (MAHAGENCO) requested CMPDI vide letter No. CMD/Mahagenco/CMPDIL/07 dated 06.10.2015 (Annexure-I) and subsequent letter no. CE(Coal)/CMPDIL/35 dated 17.11.2015 (Annexure-II) for marking of Gare Palma Sector-II Coal Block boundary on ground and on the map. CMPDI vide letter No.CMPDI/BD/A(003)Offer V-XXII/E-3364 dated 30.12.2015 submitted the proposal to MAHAGENCO. Executive Director (Fuel/Coal), Mahagenco issued a work order vide letter No. Mahagenco/ED (Fuel/Coal)/44 dated 15.02.2016 (Annexure-III) for the above job and submitted the required data to start the field work vide letter no. Mahagenco/ED (Fuel/Coal)/75 dated 15.03.2016 (Annexure-IV).

### 2.0 Background

The Nominated Authority, Ministry of Coal, Govt. of India vide its allotment order no. 103/30/2015/NA dated 31.08.2015 has allotted Gare Palma Sector-II Coal Block to the Maharashtra State Power Generation Co. Ltd. (Mahagenco) for utilization of coal for power projects.

For the development of the allotted Coal Block, the first requirement is to mark the Block Boundary on the ground.

### 3.0 Scope of the Work

The scope of the work is as follows:

- i. Marking of Gare Palma Sector-II Coal Block on ground.
- ii. Preparation of plan of block boundary in WGS 84 co-ordinate system.

Note: Pegging / pillaring at the site will have to be done by the client (MAHAGENCO).

### 4.0 Data Used

A plan of Gare Palma coal block in Coal Grid duly certified was provided by M/s Mahagenco. The plan was geo-referenced and boundary coordinates were extracted from the plan. The coordinates were used to

demarcate the boundary of the Gare Palma Sector-II Coal Block on ground.

## 5.0 Methodology

### 5.1 Differential Global Positioning System (DGPS)

Execution of the job was planned on the basis of plan of the area provided by the MAHAGENCO. For the job, DGPS (Differential Global Positioning System) survey was found to be appropriate for demarcation of the Coal Block boundary.

The Global Positioning System (GPS) is a satellite-based location, timing and navigation system in all weather conditions, anywhere on or near the Earth where there is an unobstructed line of sight to four or more GPS satellites. Presently, more than 30 orbiting satellites of GPS constellation of USA and 24 GLONASS satellites of Russia are operational for the purpose of GPS survey. With four or more satellites, a GPS receiver can determine a 3D position (i.e., latitude, longitude, and elevation).

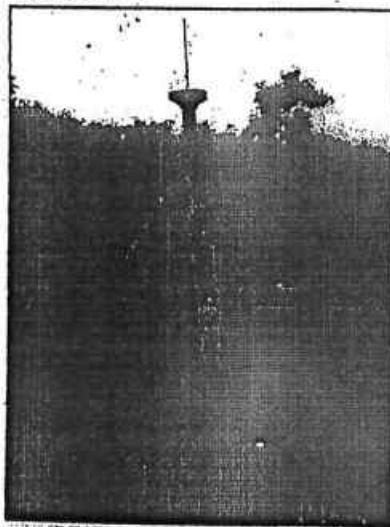

Differential Global Positioning System (DGPS) refers to using two or more GPS receivers to achieve greater positional accuracy. Basic methods of DGPS survey are Static, Rapid-Static, Real-time Kinematic (RTK) to attain higher level of accuracy.

The coordinates of the boundary points of Coal Block were known in Coal Grid Coordinates, which were converted into UTM coordinates. These points had to be staked out in the field. Stake out through Real time Kinematic (RTK) Survey was found to be most suitable. In RTK surveys, one GPS receiver is used as base and other GPS receiver can be used as Rover. Base receiver is stationed at a point of known co-ordinates for longer duration. The rover receivers are localized with respect to three known points and then boundary coordinates are staked out.

ArcGIS software is suitable for preparation of map of the block boundary in WGS-84 co-ordinates.

#### 5.1.1 Survey Instrument

For stake out of block boundary coordinates, DGPS consisting of one base receiver and two rover receivers were used. Brief specifications of the DGPS are as follows:

### 5.1.2 Details of Field Work

- a) Reconnaissance survey was done after reaching the site. Officials from Mahagenco were associated during reconnaissance and subsequent survey work.
- b) Four stations P4/6a1, P4/6a2, ATM1 and PATA1 were established in the field by DGPS in static mode with reference to the earlier established station P7/11 near boundary of Gare IV/7 and IV/8 coal blocks. Base receiver was stationed at P7/11 station for about 8 hours and rover receivers were stationed at the four stations for about 2 hours on each station.
- c) Recorded data is downloaded from the GPS and processed in Topcon tools software to get post-processed WGS-84 co-ordinates of the surveyed stations. The WGS-84 coordinates are converted into UTM coordinates through the software.

- d) Base receiver of DGPS was stationed at P4/6a1 and Rover receiver is localized in UTM through P7/11, P4/6a2 and PATA1 stations. The boundary points are staked out through rover receiver one by one. The Co-ordinates of control points are as follows:

Station Name	Observed Geographic Co-ordinates (WGS-84)		UTM Co-ordinates (Zone-44)	
	Latitude	Longitude	Northing	Easting
P7/11	22°09'53.37527N	83°29'44.69615E	2453186.826	757373.176

PATA1	22°08'07.77881N	83°28'06.51629E	2449891.899	754612.290

### 1.1.3 Computation

- The UTM coordinates of the block boundary are imported in Arc GIS software and by making boundary by joining the boundary points, plan is prepared.
- The UTM Grid and geodetic/ geographical co-ordinates along the block boundary is tabulated in Table -I.
- Geographical coordinates of cardinal points along the block boundary is tabulated in Table-II.

## 6.0 Final Output

Following output were generated :

- Map of block boundary in 1:10000 scale.
- CD containing shape file of block boundary.

## **1.0 PROJECT BACKGROUND**

The Nominated Authority, Ministry of coal, Govt. Of India , Vide its order no. 103/30/2015/NA dated 31.08.2015 and Corrigendum No1 Dated 17/02/2017 has allotted Gare Palma sector- II coal block to the Maharashtra State Power Generation Co. Ltd (MAHAGENCO) for utilization of coal for power projects.

For the development of the allotted coal Blocks, the first requirement is to mark the Block Boundary on the ground.

## **1.2 SCOPE OF WORK**

The Learn Nature Consultants is assigned for the FCA Clearance of Gare Palma Coal Block II,  
Tamnar, Dist. Raigarh.

The DGPS Points has been taken and boundary of Compartment is marked by DGPS point at every angle/Corner. All the points have been duly marked on the ground by stone pillars dully numbered.

## **2. METHODOLOGY**

### **2.1 Input data**

The land plan, maps of Gare Palma Coal Block II, Tamnar, Dist. Raigarh. required for geo-referencing was provided by MAHAGENCO to M/s Learn Nature Consultants along with the land schedules for desk study. The Topo-Sheet indicating the forest boundary was referred for mapping/ geo-referencing.

### **2.2 Desk Study**

Based on the data and information provided by MAHAGENCO, the Primary and

Secondary Control Points (PCPs and SCPs) in the project area were planned. Location of the Points were decided from the Map provided to Learn Nature Consultants.

### **2.3 Establishment of Base Station/Primary Control Point (PCP)**

The Primary Control Point was used to establish the DGPS base station for applying corrections to the Rover data. The primary control point was established on the Boundary of Gare Palma Coal Block II, Tamnar, Dist. Raigarh., which was used as the base station for DGPS Survey.

### **2.4 DGPS Control Survey**

DGPS survey was carried out using a pair of DGPS instrument. One operating from a Fixed point (Known point) called as Base Station and other working as Rover, at points for which the co-ordinates were to be fixed. With the base station kept at the PCP fixed on the Boundary of Gare Palma Coal Block II, Tamnar, Dist. Raigarh. Rover observations were made in Static mode (15-20 minutes observations) at Secondary Control points identified by LNC's Officials. The base and rover observations were Post Processed using advanced software for obtaining the final SCP coordinates.

### **2.5 Geo-Referencing of TOPOSHEET**

The relevant Topo-Sheet is Geo-referenced and registered in the AutoCAD Map software and the DGPS Point DATA was superimposed on the same to cross verification of registration process. The Secondary Control Coordinates fetched through DGPS instrument were used to geo-reference the total station survey data by applying the co-ordinate value of the field observation to the corresponding point on the map and the same is superimposed on Topo-Sheet.

HEIGHTS & CONTOURS IN METRES

CONTOUR INTERVAL 100 METRES

Water features are shown in blue where they generally contain water.

The exterior boundaries of areas of Reserved or Protected Forests are shown by green bands.

Contours are approximate.

A relative height, 100 m, represents the approximate height in metres between the top and bottom of a steep slope.

Wooded areas are coloured green. Scattered trees and other vegetation are in green but prominent surveyed trees are in black.

The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.

Where only milestones exist along any road, the values they are shown with their numbers in white type, i.e., 201, elsewhere only kilometre marks with their numbers in black type, i.e., 201 are shown, though both types of distance stones exist.

Unmetalled roads, in this sheet, which show a red discoloration, are generally measurable to dry season.

Bridge along metalled road from Gheroguda to Lallenga is of wood.

The state boundaries between Andhra Pradesh, Dharmanagar & Andhra Pradesh, Bihar & Jharkhand, Kharsa & Raigarh of Raigarh District have been surveyed as pointed out by the local officials during verification survey on the ground but have not been verified by the Government concerned.

The state boundary between Madhya Pradesh and Orissa State has been surveyed as pointed out by the local officials on the ground but has not been verified by the Government concerned.
