NOTES :

Height are in metres and above Indian mean sea level.
Contours are approximate.
A Relative height,-br, represents the approximate height, in metres between the top and bottom of a steep slope.
Tanks, shown dry, in this area usually contain water from July to December.
Unmetalled roads and cart-tracks in this sheet are generally motorable in dry season. Permission to use those along canals is required from the irrigation authorities.
Owing to periodical floods the course of the Ganga River is continually changing.
A relative height,e.g.,-br, marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.
Wells and tube-wells are numerous throughout the sheet; only the important ones have been shown.
The kilometre stone numbers along roads, railways and canals are shown in slant type,e.g., 5' whereas milestone numbers are shown in upright type,e.g., 5.
The district boundary, where it follows the main deep water channel of the Ganga River, will change with the fluctuations of that channel.

COMPILATION INDEX

A Compiled from the 1:25,000 scale Survey 1975-76. Updated from Modern Survey during 1987-88 and 2005-06.

Projection – UTM Datum – WGS 84

Magnetic Variation from True North about $\frac{3}{4}$ East in 2005. (Increasing by about 1' annually).

500 m to 1 cm 1:50,000 2 cm to 1 km

Metres 1000 500 0 1 2 3 Kilometres

CONTOUR INTERVAL 20 METRES
