NOTES :–

Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, *dr represents the approximate height, in metres, between the top and bottom of a steep slope.
The kilometre stone numbers along roads and canals are shown in slant type, e.g., '5' whereas milestone numbers are shown in upright type, e.g., '5'.
Unmetalled roads and cart-tracks along canals are generally motorable in dry season whereas other cart-tracks are generally passable in dry season. Permission to use those along canals is required from the irrigation authorities.
Perennial streams in this sheet are generally fordable from October to June at the places indicated as such.
Tanks, shown dry, in this area, usually contain water from July to October.
Wells and tube-wells are numerous throughout the sheet; only the important ones have been shown.
Areas unfit for cultivation due to layers of caustic soils are shown as "Waste land".
The triangulated & traverse heights and contours in this sheet have not been adjusted to the heights of spirit-levelled bench-marks and may not be strictly in accordance with them.
