

Recommendation

The laying / Establishment of 11 Kv H/T AB Bunch cable transmission line will help the people's living in the Panjala and Maligne enclosure. Since these areas are naxal prone area by providing basic facility like electricity will help the department to gain the confidence of villagers. Further, electric line is passing Kudremukh National Park through AB cable as per the direction of Gol. There is no necessity to cut or lop any tree and the line aligned along existing road. Area required for diversion is very meager. Hence it is recommended for accord approval for diversion

Deputy Conservator of Forests,
Kudremukh Wildlife Division,
KARKALA.
