HEIGHTS & CONTOURS IN METRES

CONTOUR INTERVAL 100 METRES

Water features are shown in blue where they generally contain water.

The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribands.

Contours are approximate.

A relative height, .6r, represents the approximate height, in metres, between the top and bottom of a steep slope.

Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

Administrative Index

1 SEHORE.
2 NARSIMHAPUR.

The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.

Where only milestones exist along any road or railway they are shown with their numbers in upright type, i.e., '20'; elsewhere only kilometre stones with their numbers in slant type, i.e., '20' are shown even though both types of distance stones exist.

Generally cart-tracks are jeepable and unmetalled roads are motorable in dry season.

Some of the Protected and Reserved Forest boundaries have not been shown in this sheet for want of reliable information.

Some roads, canals, telephone lines, power lines and reservoirs etc. have been entered as a result of verification survey carried out during 1982-83.

The tahsil boundary between Piparia and Sohāgpur has been surveyed during 1982-83 as pointed out by the local officials on the ground but has not been verified by the concerned authorities.
