NOTES :-

Contours are approximate.
Heights are in metres and above Indian mean sea level.
Tanks, shown dry, in this area usually contain water from July to December.
Milestones are numerous throughout the sheet; only the important ones have been shown.
A relative height e.g.,.5r, marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.
Cart-tracks and unmetalled roads on this sheet are generally motorable in dry season. Permission to use those along canals is required from the irrigation authorities.
The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.
The state boundary between Delhi and Haryāna States has been surveyed as pointed out by the local officials on the ground but has not been verified by the Governments concerned.
Important buildings are shown in black with names.
A relative height . . .8r, represents the approximate height, in metres, between the top and bottom of a steep slope.
The tahsil boundaries in Delhi State have not been shown in this sheet for want of reliable information.
