NOTES :-

Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, e.g. 8, represents the approximate height, in metres, between the top and bottom of a steep slope.
The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not beatrictly in accordance with them.
All cart-tracks and unmetalled roads in this sheet are generally motorable in dry season. Permission to use those along canals is required from the irrigation authorities.
A relative height e.g. 3 marked along canal, indicates the height of the top of the canal embankment embankment above the adjacent country.
Wells and tube-wells are numerous throughout the sheet; only the important ones have been shown.
Tanks shown dry in this area, usually contain water from July to March.
