NOTES :-

Heights are in metres and above Indian mean sea level.

Contours are approximate.

A relative height, (h) represents the approximate height, in metres, between the top and bottom of a steep slope.

The triangulated heights and contours in this sheet have not been adjusted to the heights of the spot-levelled bench-marks and may not be strictly in accordance with them.

The course of the Kosi River has altered so greatly since the previous survey that adjustment of north edge is not possible.

Unmetalled roads and cart-tracks in this sheet are generally motorable in dry season.

Tanks, shown dry, in this area usually contain water from July to February.

Protective embankments in this sheet are generally motorable in dry season. Permission to use these protective embankments is required from Waterways authorities.

Distance stones along Kosi Bund are 1,000 metres apart.
