HEIGHTS & CONTOURS IN METRES
CONTOUR INTERVAL 10 METRES

Water features are shown in blue where they generally contain water.

Cultivated areas are coloured yellow.

The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribands.

Contours are approximate.

A relative height, '8r', represents the approximate height, in metres, between the top and bottom of a steep slope.

Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

The kilometre stone numbers along roads and railways are shown in slant type, e.g., '5' whereas milestone numbers are shown in upright type e.g., 5.

A relative height, e.g., '6r', marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.

Unmetalled roads and cart-tracks in this sheet are motorable in dry season. Permission to use those along canals, is required from the Irrigation authorities.

Tanks shown dry in this area, usually contain water from July to December.

The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.

Wells and tube-wells are numerous throughout the sheet; only the important ones have been shown.
