

Sub: Essential Details Sought (EDS) on 3/9/2015

Proposal no. FP/CG/Other/7694/2014

Proposal name: Slurry Pipeline Project NMDC

Q: Between Padhapur and Bacheli why there is discontinuity in pipeline route, be explained.

· There is no discontinuity in the pipeline route between Padhapur and Bacheli.

Q Both .kml files are same and they do not show total area.

· In .kml file the Dantewada and Bastar districts are shown in separate colors. The Dantewada division is from chainage 0+000 to 57+000mts chainage and Bastar division is from 57+000mts chainage to 138+825 mts chainage.

· Both the divisions are shown in same .kml in order to keep the continuity of the slurry pipeline. Dantewada division chainage is shown in yellow color where as Bastar division is shown in blue color.

· Village wise breakup of the slurry pipeline along with forest block areas are shown in table and the same is attached in additional information.
