NOTES :-

Contours are approximate.
Heights are in metres and above Indian mean sea level.
The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.
Tanks shown dry, in this area usually contain water from July to December.
Unmetalled roads and cart-tracks along canals are motorable throughout the year. Permission to use these is required from the Irrigation authorities. Other unmetalled roads and cart-tracks in this sheet are generally motorable in dry season.
A relative height e.g. ‘3r’ marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.
The area adjoining the Yamuna and Hindan Rivers are liable to change owing to continual fluctuation in the course of rivers.
Tube-wells are numerous throughout the sheet; only the important ones have been shown.
Important buildings are shown in black with names.
A relative height ‘6’, represents the approximate height, in metres, between the top and bottom of a steep slope.
The talsil boundaries in Delhi State have not been shown in this sheet for want of reliable information.
The state boundaries between Delhi & Haryāna and Haryāna & Uttar Pradesh States have been surveyed as pointed out by the local officials on the ground but have not been verified by the Governments concerned.
