NOTES :-

Contours are approximate. Heights are in metres and shown above mean sea level.
A relative height e.g. 3 marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.
Tube-wells are numerous throughout the sheet, only the important ones have been shown.
Tanks shown dry, in this area usually contain water from March to December.
A relative height, e.g. 30, marked against a well, indicates its depth in metres.
Distance stones along canal are 1,000 feet apart and every seventh fifth stone is shown.
All cart-tracks and unmetalled roads along canals are motorable throughout the year. Permission to use these is required from the irrigation authorities. Other cart-tracks are generally motorable in dry season.
The triangulated heights and contours in this sheet have not been adjusted to the heights of spirit-levelled bench marks and may not be strictly in accordance with them.
The state boundary between Haryāna and Punjāb states has been surveyed as pointed out by the local officials on the ground, but has not been settled by the Government concerned.
5,000 - aces rectangulation stones of Bhākra Dam Project Surveys based on Origin 30°00'N, 75°15'E with their numbers are shown on tertiary bench marks thus— 5 BM 224.1
