Circuit house. Camping ground. Forest: reserved; protected CH CG R F PF
Spaced names: administrative; locality or tribal KIKRI NAGA

PRINTED AT THE (D3)(P2D) PRINTING GROUP OF SURVEY OF INDIA.

HEIGHTS & CONTOURS IN METRES
CONTOUR INTERVAL 20 METRES

*Water features are shown in blue where they generally contain water.
*Cultivated areas are coloured yellow.
The exterior boundaries of areas of Reserved or Protected Forests are shown by green Arrowheads.

Contours are approximate.
A relative height, .8r, represents the approximate height, in metres, between the top and bottom of a steep slope.
Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

*Not applicable.

The kilometre stone numbers along roads, railways and Rāmgangā Project Feeder are shown in slant type, e.g., '5' whereas milestone numbers are shown in upright type, e.g., '5'.
The districts boundary, where it follows the main deep water channel of the Gangā River, will change with the fluctuations of that channel.
Owing to periodical floods the course of the Gangā River is continually changing.
A relative height, e.g., .8r, marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.
Wells and tube-wells are numerous throughout the sheet; only the important ones have been shown.
Tanks, shown dry in this area, usually contain water from July to December.
Unmetalled roads and cart-tracks in this sheet are generally motorable in dry season. Permission to use those along canals is required from the Irrigation authorities.
Some roads and cart-tracks in this sheet have been incorporated as a result of the verification survey carried out during 1975-76.
This sheet has been compiled from 1:25,000 survey.
