1st Edition 2011. Price : Rs. 70 /-

CONVENTIONAL SYMBOLS

REFERENCES

NOTES :-

Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, e.g. ...6x represents the approximate height, in metres, between the top and bottom of a steep slope.
The kilometre stone numbers along roads and railways are shown in slant type, e.g., '8' whereas milestone numbers are shown in upright type, e.g., 8.
The triangulated and traverse heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.
Wells are numerous throughout the area; only the important ones have been shown.
Cart-tracks and unmetalled roads in this sheet are generally motorable in dry season. Permission to use those along canals is required from the irrigation authorities.
A relative height, e.g. /6/, marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.
Tanks, shown dry, in this area usually contain water from July to January.
Area unfit for cultivation, due to layers of caustic soda are shown in Waste land.
The letter P stands for Pure, Pucca or Ponds.

COMPILATION INDEX

A Surveyed during 1971-76. Updated for major details during 2003-04 and administrative boundaries updated during 2008-09.

Projection – UTM Datum – WGS 84

Magnetic Variation from True North about 0° in 2005.
(Increasing by about 1° East annually).

1:50,000

CONTOUR INTERVAL 20 METRES
