NOTES :-

Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, e.g.,8r, represents the approximate height, in metres, between the top and bottom of a steep slope.
All cart-track and unmetalled roads in this sheet are generally motorable in dry season. Permission to use those along canals is required from the irrigation authorities.
The traverse heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.
The kilometre stone numbers along roads, railways and canals are shown in slant type, e.g., 5 whereas milestone numbers are shown in upright type, e.g., 5.
The area adjoining the Ghāghara river and Sarju Nadi are liable to change owing to continual fluctuation in the course of the river.
Tube-wells are numerous throughout the sheet; only the important ones have been shown.
Forest boundaries and their pillars shown in this sheet are of unclassified forests.
Tanks, shown dry in this area, usually contain water from July to December.

COMPILATION INDEX
