HEIGHTS & CONTOURS IN METRES
CONTOUR INTERVAL 20 METRES

Water features are shown in blue where they generally contain water.

Cultivated areas are coloured yellow.

The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribands.

Contours are approximate.

A relative height, e.g. 6r, represents the approximate height, in metres, between the top and bottom of a steep slope.

Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

This sheet has been compiled from 1:25,000 survey.

The forest boundaries have been surveyed as pointed out by the local officials on the ground, but have not been verified by the authorities.

A relative height, e.g. 6r, marked along a canal indicates the height of the top of the canal embankment above the adjacent country.

Unmetalled roads and cart-tracks in this sheet are generally motorable in dry season. Permission to use those along canals is required from the irrigation authorities.

Tanks, shown dry, in this area usually contain water from July to December.

The kilometre stone numbers along roads and canals are shown in slant type e.g. '5' whereas milestone numbers are shown in upright type e.g. '5'.
