HEIGHTS & CONTOURS IN METRES
CONTOUR INTERVAL 10 METRES

Water features are shown in blue where they generally contain water.
Cultivated areas are coloured yellow.
The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribands.

Contours are approximate.
A relative height, 87, represents the approximate height, in metres, between the top and bottom of a steep slope.
Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

The kilometre stone numbers along roads, railways and canals are shown in start type, e.g. 7, whereas all other numbers are shown in upright type, e.g. 7.
Tanks, shown dry in this area, usually contain water from July to December.
Wells are numerous throughout the sheet, only the important ones have been shown.
Owing to periodical floods the course of the Ganga River is continually changing.
All earth and unmetalled roads along canals are motorable in dry season, whereas cart-tracks are impassable in dry season. Permission to use these along canals is required from the irrigation authorities.

Administrative Index
