HEIGHTS & CONTOURS IN METRES

CONTOUR INTERVAL 20 METRES

Water features are shown in blue where they generally contain water.

Cultivated areas are coloured yellow.

The exterior boundaries of areas of Reserved or Protected Forests are shown by green rimands.

Contours are approximate.

A relative height, 'dr', represents the approximate height, in metres, between the top and bottom of a steep slope.

Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not lie strictly in accordance with them.

Unmetalled roads and cart-tracts in this sheet are generally non-trable in dry season.

Tanks, shown dry, in this area usually contain water from July to January.

A relative height e.g. /3/, against a well, in blue, indicates its total depth in metres.

The kilometre stone numbers along roads are shown in plain type, e.g. '5' whereas milestone numbers are shown in upright type, e.g. '5'.

Wells are numerous throughout the cultivated portions of this sheet only the important ones have been shown.

The common boundaries of the Reserved Forests between Mudāna RF & Dindāla RF and Krishnāpur RF & Pārdi Baldi RF in squares A/1, 2 have not been shown for want of reliable information.
