NOTES :-

Heights are in metres and above mean sea level.
Contours are approximate.
A relative height, '3' and e.g., represents the approximate height, in metres, between the top and bottom of a steep slope.
The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.
Wells and tube-wells are numerous throughout the sheet; only the important ones have been shown.
The perennial rivers are generally fordable from October to June at the places indicated as such.
Tanks, shown dry in this area, usually contain water from July to February.
All unmetalled roads, in this sheet, are motorable in dry season.
In Marathi names the letter d has frequently the sound of ḍ; v invariably the sound of ʋ and v invariably that of w, when an initial letter, and of v when otherwise placed.
