Compliance Report of In-principle approval for diversion of 22.1820 ha of Forest land for laying of 765 kV S/C form Champa – Dharamjaygarh Transmission line under Forest Conservation Act, 1980 in Janjgir and Baloda District in the State of Chhattisgarh. accorded by the Government of India, Ministry of Environment & Forests, Regional Office. (Western Central Zone), Nagpur. Vide letter no. FC-II/CH-69/2017-NGP/2559. Dated 07.07.2017.

Compliance of Conditions

Sl.no	Conditions laid down by Central Government		Compliance Status
(i)	The legal status of the forest land shall remain unchanged	:	Chhattisgarh WR Transmission Limited, agrees to the condition. Undertaking for the same enclosed as Annexure I
(ii)	Compensatory afforestation over non-forest land, equal in extent to the forest land being diverted, shall be raised and maintained by the State Forest Department at the cost of the User Agency;	:	Land for Compensatory afforestation admeasuring 28.749 Ha transferred and muted in favor forest department Government of Chhattisgarh, the copy of same is enclosed as Annexure II. Cost of Compensatory afforestation Rs. 1,83,93,825/- paid to CAMPA account copy of same is enclosed as Annexure II.
(iii)	The land identified for the purpose of CA shall be clearly depicted on a Survey of India toposheet of 1:50,000 scale;	:	The land identified for Compensatory Afforestation clearly depicted on a Survey of India toposheet of 1:50,000 scale attached as Attachment III
(iv)	The non-forest land identified for raising compensatory afforestation shall be transferred and mutated in favour of the State Forest Department before issue of the Stage-II clearance;	:	The non-forest land 28.749 Ha in Bargaon village Rajnandgaon district has been transferred and mutated in favour of Forest Department, Government of Chhattisgarh. (Refer the copy of the same is enclosed as Annexure II)
(v)	The non-forest land transferred and mutated in favour of the State Forest	:	Compensatory Afforestation land transferred and mutated in favor of

	Department shall be notified by the		forest department.
	State Government as RF under	ĺ	State Government has initiated the
	Section-4 or PF under Section-29 of		process of notifying the CA land as
	the Indian Forest Act, 1927 or under		RF under section 4 copy of the same
	the relevant Section(s) of the local		is enclosed as Annexure IV
	Forest Act, latest within a period of		
	six months from the date of issue of	l	
	Stage-II approval. The Nodal Officer		
	shall report compliance in this regard		
	along with a copy of the original		
	notification declaring the non-forest		
	land under Section 4 or Section 29		
	of the Indian Forest Act, 1927 or		
	under the relevant sections of the		
	local Forest Act, as the case may be,		
	within the stipulated period to the		
	Central Government for information		
	and record;		
	The User Agency shall transfer the	:	The cost of Compensatory
	cost of raising and maintaining the		Afforestation, Rs. 18,39,3,825/- has
	compensatory afforestation, at the		been transferred to the Ad-hoc
	current wage rate, to the State		CAMPA (Refer Annexure II for bank
(vi)	Forest Department. The scheme may		challan)
	include appropriate provision for		
	anticipated cost increase for works		
	scheduled for subsequent years;		
	The State Government shall charge	:	Net Present Value (NPV) of Rs
	the Net Present Value (NPV) of the		1,61,10,373/- paid in the CAMPA
	forest land being diverted under this		account (Refer Annexure II for bank
	proposal from the User Agency as		challan)
	per the orders of the Hon'ble		
(vii)	Supreme Court of India dated		l
(0.17	28.03.2008, 24.04.2008 and		
	09.05.2008 in Writ Petition (Civil)		l.
	No. 202/1995 and the guidelines		
	issued by this Ministry vide its letter		
	No. 5-3/2007 -FC dated 05.02.2009		
	in this regard;		

	At the time of payment of the Not	— .	An undertaking to pay the additiona
(viii)	Present Value (NPV) at the then prevailing rate, the User Agency shall furnish an undertaking to pay the additional amount of NPV, if so determined, as per the final decision of the Hon'ble Supreme Court of India;	•	Amount of NPV is enclosed as Annexure V
(ix)	All the funds received from the user agency under the project, except the funds realized for regeneration / demarcation of safety zone, shall be transferred to Ad-hoc CAMPA in the Saving Bank Account pertaining to the State concerned;	:	All payments has been transferred to Ad-hoc CAMPA as per following details. Compensatory Afforestation cost: Rs 1,83,93,825/- Net Present Value: Rs. 1,61,10,373 /- Total: 3,45,04,198/- Paid through RTGS Dated 07.11.2017 Application No: 6418820860 Pay account no: 150646418820860 Tree felling Rs. 7,08,233/- DD No.022221, Dated 08.11.2017 In favor of Divisional Forest Officer, Janjgir Champa.
(x)	The User Agency shall obtain the Environment Clearance as per the provisions of the Environmental (Protection) Act, 1986, if required;	:	Not Applicable as transmission lines are not included in the schedule of EIA notification 2006.
(xi)	No approach road shall be constructed in the forest area for transportation of steel and other material required for the transmission line. As far as possible the User Agency shall use the existing road and the proposed ROW for the transportation of the material and in the event of non-availability of such facilities, the User Agency shall transport material manually without construction of any path		Undertaking for same enclosed as Annexure VI.

(xii)	No labour camp shall be established on the forest land;	:	No Labour camp will be established on forest land. Undertaking for same enclosed as Annexure VII.
(xiii)	The User Agency shall provide firewood preferably alternate fuels to the labourers and the staff working at the site so as to avoid any damage and pressure on the nearby forest areas;	•	Undertaking for same enclosed as Annexure VIII.
(xiv)	The boundary of the diverted forest land shall be demarcated on ground at the project cost, by erecting four feet high reinforced cement concrete pillars, each inscribed with its serial number, forward and back bearing and distance from pillar to pillar;	:	Boundary of the forest land to be diverted has been demarked on ground at project cost and the same is accepted by Forest department Khairagarh, Copy of same is enclosed as Annexure IX
(xv)	The forest land shall not be used for any purpose other than that specified in the proposal	:	Undertaking for same enclosed as Annexure X.
(xvi)	The User Agency shall ensure that because of this project, no damage is caused to the wildlife available in the area;	:	Undertaking for same enclosed as Annexure XI.
(xvii)	Comments of the PCCF (Wildlife) on the impact of the project on the schedule-I species and recommendations, if any, suggested by the PCCF (Wildlife), Chhattisgarh shall be implemented by the User Agency at the project cost;		The report enclosed, we hereby undertake the cost of recommendations as per report.
(xviii)	The User agency, if required, shall undertake comprehensive soil conservation measures at the project cost in consultation with the State Forest Department	:	Undertaking for same enclosed as Annexure XII.
(xix)	Width of right of way for the transmission line shall be limited to 67 meters;	:	Right of way of 64 meters will be maintained as this is 765 kV S/C Line. (As per MoEF Notification 7-25/2012,

Chhattisgarh – WR Transmission Limited (Program under Government of India - Additional System Strengthening Scheme for Chhattisgarh & WR IPP)

			05.05.2014)
(xx)	The layout plan of the proposal shall not be changed without the prior approval of the Central Government.	:	There is no changes in the layout of the project.
(xxi)	The forest land proposed to be diverted shall under no circumstances be transferred to any other agency, department or person without prior approval of the Central Government;	:	Undertaking for same enclosed as Annexure XIII.
(xxii)	The user agency shall install circuit breakers at suitable places besides maintain necessary ground clearance to prevent electrocution of wild animals;	:	Undertaking for same enclosed as Annexure XIV.
(xxiii)	Any tree felling shall be done only when it is unavoidable and that too under strict supervision of the State Forest Department;	:	Undertaking for same enclosed as Annexure XV.
(xiv)	To minimize the felling for construction of transmission line, user agency shall comply with the following guidelines:	:	Undertaking for same enclosed as Annexure XVI.
	(a) Below each conductor, width clearance of 10 meters would be permitted for carrying the tension stringing equipment. The trees on such strips may be felled but after stringing work is completed, the natural regeneration will be allowed to come up.	:	
	(b) One outer strip may be left clear to permit maintenance of the transmission line;	•	
	(c) In the remaining width the right of way felling/pollarding/pruning of trees will be done with the permission of the local forest	:	

	officer whenever necessary to maintain the electrical clearance, trees shall be allowed to be felled or lopped to the extent required, for preventing electrical hazards by maintaining the minimum 9.0 meter clearance between conductors and trees. The sag and swing of the conductors are to be kept in view while working out the minimum clearance mentioned as above:		
	 (d) User agency in consultation with the State Forest Department prepare a detailed scheme for creation and maintenance of plantation of dwarf species (preferably medicinal plants) in right of way under the transmission line, and provide funds for execution of the said scheme to the State Forest Department; and 	:	
	(e) In case a portion of the transmission lines to be constructed is located in hilly areas, where adequate clearance is already available, trees shall not be cut;	:	
(xxv)	The user agency in consultation with the State Government shall create and maintain alternate habitat/home for the avifauna, whose nesting trees are to be cleared in this project. Bird's nests artificially made out of eco-friendly material shall be used in the area, including forest area and human settlements, adjoining the forest area being diverted for the	:	A survey carried out for providing of alternate re-habitat for avifauna with artificially made eco-friendly material to compensate the loss to the avifauna base of the affected area. Report enclosed as Annexure XVII .

	project;		
(xvi)	The State Government shall ensure that settlement of rights, in terms of the Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006, if any, has been completed in accordance with the Guidelines issued by the MoEF&CC in this regard:	:	FRA certificate issued by Office of District Collector enclosed as Annexure XVIII.
(xxvii)	The User Agency shall submit six monthly self-compliance reports as on 1st January and 1 st July of every year to this office as well as to the Nodal Officer of the State;	:	Noted & will comply
(xxviii)	The State Government shall monitor compliance of conditions of Forest Clearance and shall submit in this regard yearly report as on 31 st December of every year;	:	Pertains to Forest Department
(xxix)	Any other condition that the concerned Regional Office of this Ministry may stipulate, from time to time, in the interest of conservation, protection and development of forests & wildlife;	•	Undertaking for same enclosed as Annexure XIX.
(xxx)	The User Agency and the State Government shall ensure compliance to provisions of the all Acts, Rules, Regulations and Guidelines, for the time being in force, as applicable to the project; and	:	Undertaking for same enclosed as Annexure XX.
(xxxi)	Grant of working permission to the extant proposal may be considered by the State Government in accordance with the provisions as contained in the MoEF & CC's Guidelines dated 28.08.2015.	:	Pertains to Forest Department

विषय :- क्षतिपूर्ति वनीकरण कार्य के लिये उपलब्ध कराई गई राजस्व भूमि को आरक्षित वन घोषित करने संबंधी अधिसूचना प्रस्ताव बाबत।

-000-

उपरोक्त विषय के संबंध में अवगत हो कि आवेदक संस्थान छत्तीसगढ़ डब्ल्यू.आर. ट्रांसमिशन लिमिटेड अहमदाबाद द्वारा 765 के.व्ही. चांपा--धरमजयगढ़ ट्रांसमिशन लाईन कार्य के लिये जांजगीर चांपा वनमंडल की प्रभावित हो रही 22.1820 हे. वनभूमि के लिये वन संरक्षण अधिनियम 1980 के अंतर्गत आवश्यक प्रस्ताव प्रस्तुत किया गया था। इस प्रस्ताव पर ऑनलाईन पंजीयन क्रमांक FP/CG/TRANS/18820/2016 आबंटित किया गया है।

आवेदक संस्थान द्वारा उपरोक्त प्रभावित हो रही वनभूमि के विरुद्ध क्षतिपूर्ति वनीकरण कार्य के लिये खैरागढ़ वनमंडल के अंतर्गत खैरागढ़ परिक्षेत्र के उपवृत्त चंगुर्दा परिसर बरगांव पूर्व के वनकक्ष क्रमांक पी–328 एवं आर–324 की सीमा से लगी हुई भूमि स्वामियों की निजी भूमि 30.645 हे. उपलब्ध कराने का विनिश्चय किया गया था। इस बाबत क्षेत्र रोपण उपयुक्तता प्रमाण पत्र इस कार्यालय द्वारा पूर्व में दिया गया है।

विषयांकित प्रकरण में भारत सरकार पर्यावरण, वन एवं जलवायु परिवर्तन मंत्रालय क्षेत्रीय कार्यालय नागपुर के पत्र क्रमांक / FC-II/CH-69/2017-NGP/2559 दिनांक 21.09.2017 द्वारा प्रथम चरण की सैद्धांतिक स्वीकृति जारी की गई है। इस स्वीकृति के अधिरोपित शर्त कंडिका (V) के अनुसार उपरोक्त निजी भूमि को वन विभाग के नाम पर नामांतरित एवं हस्तांतरित किया जाना है तथा शर्त कंडिका (VI) के अनुसार वर्ष 2017–18 के लिये प्रचलित दर के अनुसार क्षतिपूर्ति वनीकरण की राशि एडहाक कैम्पा के खाते में जमा कराया जाना है। इस शर्त के तारतम्य में वन मंडल अधिकारी जांजगीर चांपा वनमंडल द्वारा आवेदक संस्थान को राशि 600222 / – रूपये प्रति हे. की प्रचलित दर से 30.645 हे. क्षेत्र में क्षतिपूर्ति वनीकरण कार्य कराये जाने के लिये राशि 183393825 / – रूपये तथा शुद्ध प्रत्याशा मूल्य की राशि 16110373 / – रूपये इस प्रकार कुल राशि 34504198 / – रूपये एडहाक कैम्पा के खाते में जमा कराये जाने हेतु डिमांड नोट जारी किया गया था। आवेदक संस्थान द्वारा उक्त राशि ई–चालान के माध्यम से जमा कराई गई है।

आवेदक संस्थान द्वारा क्षतिपूर्ति वनीकरण कार्य के लिये प्रस्तावित की गई 30.645 हे. निजी भूमि के विरुद्ध वर्तमान में शर्त कंडिका (V) की पूर्ति के लिये विभिन्न खसरों की 28.749 हे. निजी भूमि जो व्यपवर्तित की गई वनभूमि 22.1820 हे. से अधिक है, का DGPS सर्वे कार्य कराकर उसे राजस्व प्रकरण क्रमांक 13–24 वर्ष 2017–18 तहसीलदार खैरागढ़ के समक्ष प्रस्तुत कर दिनांक 30.12.2017 को वन विभाग के नाम पर नामांतरित कराया गया है। विवरण निम्नानूसार है :–

UNDERTAKING

Project Name: 765 kV S/C Champa - Dharamjaygarh Transmission Line

M/s. Chhattisgarh-WR Transmission Limited hereby undertakes that...

- a) Below each conductor, width clearance of 10 meters will be maintained for carrying the tension stringing equipment. The trees on such strips will be felled after stringing work is completed, the natural regeneration will be allowed to come up
- b) One outer strip will be left clear to permit maintenance of the transmission line
- c) In the remaining width the right of way felling/pollarding/pruning of trees will be done with the permission of the local forest officer whenever necessary to maintain the electrical clearance, trees will be allowed to be felled or lopped to the extent required, for preventing electrical hazards by maintaining the minimum 9.0 meter clearance between conductors and trees. The sag and swing of the conductors are to be kept in view while working out the minimum clearance mentioned as above
- d) In consultation with the State Forest Department prepare a detailed scheme for creation and maintenance of plantation of dwarf species (preferably medicinal plants) in right of way under the transmission line, and provide funds for execution of the said scheme to the State Forest Department; and
- e) In case a portion of the transmission lines to be constructed is located in hilly areas, where adequate clearance is already available, trees will not be cut;

For, Chhattisgarh-WR Transmission Limited.

(Manoj Deshanukh) Director

Acknowledgement

The Biodiversity Society of Chhattisgarh is deeply indebted to Shri Vishwanath Patel, Manager CWRTL, Shri Tarak Banerjee, Shri Kaushal Prasad Singh of CWRTL, for their cooperation in conducting the preliminary survey.

Society members Vikas Agrawal, Bhagwat Tavri, Sonu Arora, gave their valuable help for conducting field survey and taking site Photographs.

Thanks to M/s. Rashmi Printers for print of the report and Smt. Geeta Sahani for typing the script.

Also thanks to several others, who spared their valuable time in conducting the survey and assistance in other works, directly or indirectly.

Report, a summary

The Ministry of Power, Government of India has initiated a scheme for development of Transmission System for evacuation of power from various Generating Stations, Transmission of Power from Pooling Stations to Other Grid Stations up to Load Centres & Strengthening of Transmission Network across state.

CHHATTISGARH WESTERN REGION TRANSMISSION LIMITED (CWRTL) is laying 765 KV D/C transmission line vide Forest proposal No. Proposal No: FP/CG/TRANS/18820/2016.

Regional office Nagpur of Ministry of Environment, Forests and Climate Change (Forest Conservation Division) GOI vide their communication No. FC - II/CH-69/2017-NGP/2559 Dt. 21/9/2017 have inserted following clause to permit forest clearance.

Condition XXV - "The user agency in consultation with the State Government shall create and maintain alternate habitat/home for the avifauna, whose nesting trees are to be cleared in this project. Bird's nests artificially made out of eco-friendly material shall be used in the area, including forest area and human settlements, adjoining the forest area being diverted for the project;"

In accordance with the aforesaid transmission line CWRTL has asked Chhattisgarh Biodiversity Society to do a survey work and compensate the loss to the avifauna base of the affected area.

CHHATTISGARH WESTERN REGION TRANSMISSION LIMITED (CWRTL) 765 KV D/C transmission line has vide their Service Order (SO) No. 5700218434 asked Chhattisgarh Biodiversity Society to Provide consultancy service & to carry out survey for avifauna in forest & surroundings and to determine & submit project reports to provide alternate Re-habit for avifauna with artificially made eco-friendly materials.

During our study we noticed maybe due to global change in environment pattern and change/delay in monsoon this year only few of the migratory species had arrived, out of our estimated calculation about only 10% migratory species were recorded. (Detailed and extensive survey of the area may be required to achieve at a conclusive figure) Of the nests which were sighted/recorded about 55% of the nest were on Trees /canopy, 22% use natural/self made holes in trees, 14% on ground and rest on cliffs and human settlements. Following types of nests are suggested for installation as suitable places, based on the data acquired of the field survey as mentioned earlier.

Various roosting sites and nests of Cattle Egret, Jungle owlet, Spotted owlet, Baya weaver, Common Myna & Bhramny Starlings were documented. Resident birds like Pied bushchat, crows etc. were commonly sighted.

Although bird's acceptance of artificial nests is very low, but it has been observed that with proper care and scientific approach their chance of acceptance is increased considerably. Types of nest suggested can be of clay nests, Wooden boxes with opening, logs with natural holes, creation of Soil & gravel mounds, Wooden Platforms. It is important that the maximum area be kept intact as for as possible.

18 old abandoned inactive nests were found, various roosting sites of Cattle Egrets, Little Cormorants, Common Myna, Aisan Pied Starlings & House Sparrows were documented. Resident birds like Pied bushchat, crows etc. were commonly sighted.

Trees and shrubs play a major part in the food base of the birds, felling of big trees which would fall on the ground will destroy this foodbase, many bird friendly trees/shrubs (fruit bearing etc.) can be planted to compensate this loss.

As per the permission issued by Regional office MoEF & CC Nagpur below each conductor, width clearance of 3 meters would be permitted for carrying the tension stringing equipment. The trees on such strips may be felled but after stringing work is completed, the natural regeneration will be allowed to come up.

In the remaining width the right of way felling/pollarding/pruning of trees will be done with the permission of the local forest officer whenever necessary to maintain the electrical clearance, trees shall be allowed to be felled or lopped to the extent required, for preventing electrical hazards by maintaining the minimum 9.0 meter clearance between conductors and trees. The sag and swing of the conductors are to be kept in view while working out the minimum clearance mentioned as above.

To add to the compensation few water bodies can be created along the line or in near vicinity so that rainwater and water from other sources viz. natural springs etc. are collected in it and can be of great help to the birds/animals of the area.

Seperate programs or drives can be formulated and implemented for the awareness of the villagers to protect and to minimize threat to the avifauna species found in the area.

Every effort is made to compensate the environmental impact on the avaifauna. A holistic approach is therefore kept in mind to create this report.

To add to the compensation few water bodies can be created along the line or in near vicinity so that rainwater and water from other sources viz. natural springs etc. are collected in it and can be of great help to the birds/animals of the area.

Seperate programs or drives can be formulated and implemented for the awareness of the villagers to protect and to minimize threat to the avifauna species found in the area.

State Biodiversity (Flora& Fauna)

The state of Chhattisgarh being placed in Deccan bio-geographical Area, houses an important part of that rich and unique biological diversity. What is a more conspicuous is that the state is significantly rich in endemism with respect to many plants having medicinal importance. The forests of the state fall under two major forest

types, i.e., Tropical Moist Deciduous forest and the Tropical Dry Deciduous forest. The state of Chhattisgarh is endowed with about 22 varied forest sub-types existing in the state. Sal (Shorea Robusta) and Teak (Tectona grandis) are the two major tree species in the state. Other notable overwood species are Bija (Pterocarpus marsupium), Saja (Terminalia tomentosa), Dhawra (Anogeissus latifolia), Mahua (Madhuca indica), Tendu (Diospyros melanoxylon) etc. Amla (Embilica officinalis), Karra (Cleistanthus collinus) and bamboo (Dendrocalamus strictus) constitute a significant chunk of middle canopy of the state forests. From the management point of view, there are four types of forests in the state of Chhattisgarh. These are Teak, Sal, Miscellaneous and Bamboo forests. The variation in the genetic composition of individuals within or among floristic and faunal species is large.

Some distinct varieties of common birds are also found in Bastar. For instance, the Jungle Crow is pitch dark and slightly larger than the domestic crow. It has a heavy-duty bill and a deep and hoarse "caw." It is more audacious in attacking the nests of gentler birds and even the pups of smaller animals. Its movement in the forest often leads to tiger or panther kills.

Other species of avifauna include partridges (which nest in shrubs outside villages and run almost as fast as they fly), cattle egret, pond heron, babblers, parrots and parakeets, blue jay, wagtails, quails (both black and grey varieties), bulbul, koel, fly catchers, woodpeckers, sun bird and weaver bird.

Major wildlife species include blue bull, Chinkara, black buck, Sambhar, Barking Deer, wild dog, wild boar, jackals, hyena, and crocodiles. Panthers are distributed almost all over Bastar, especially in the Northern plains. Indian sloth bears are in the Northern plains around Kanker and in the Southern part around Bailadila. Crocodiles are in the riverine ponds in the Kanger Valley National Park at Bhaisa-darha.

Chhattisgarh; Status

Chhattisgarh is located in Central India. The state shares its border with Madhya Pradesh and Maharashtra in the west, Uttar Pradesh in the north, Odisha and Jharkhand in the east and Andhra Pradesh in the south.

Chhattisgarh is presently one of the few states that have surplus power. Korba district in Chhattisgarh is known as the power capital of India. It is also among the few profitable states in terms of utility-based electricity. By the end of 2016-17, Chhattisgarh has planned to achieve installed power generation capacity of 30,000 MW. The gross state domestic product (GSDP) of Chhattisgarh is expected to reach US\$ 47.75 billion in FY 2018 from US\$ 36.6 billion in FY 2015. The GSDP of

the state grew at a compound annual growth rate (CAGR) of 11.83 per cent between 2004-05 and 2015-16.

Mineral resources are Chhattisgarh's biggest strength. Chhattisgarh is a leading producer of minerals such as coal, iron ore and dolomite, accounting for about 22.6 per cent, 19.8 per cent and 36.5 per cent of India's production, respectively. Moreover, considerable reserves of bauxite, limestone and quartzite are available in the state. Chhattisgarh is the only state in India that produced tin concentrates. The state accounts for 35.4 per cent of tin ore reserves of India.

Chhattisgarh has emerged as one of the most preferred investment destinations in India. The state has been acclaimed as "one of the best fiscally managed states" by the Reserve Bank of India (RBI). The state attracted cumulative FDI worth US\$ 1.29 billion from April 2000-March 2016.

A wide range of fiscal and policy incentives for businesses have been announced under its Industrial Policy, 2014-19. Additionally, the state has well-drafted policies for the IT/ITeS, solar energy, agro and food processing, minerals and biotechnology sectors. Chhattisgarh stands fourth among Indian states in rankings based on ease of doing business and reforms implementation, according to a study by the World Bank and KPMG.

Chhattisgarh; Status (Cont.)

Key Sectors:

Mining: Chhattisgarh is the only state in India to produce tin concentrates and accounts for 36 per cent of the country's tin ore reserves. Dante Wada is the sole district producing tin from 6 mines. The state accounts for 4 per cent and 36.5 per cent of the country's diamond and dolomite reserves, respectively. It ranks among the top coal, tin and dolomite production states in the country.

Iron and Steel: Chhattisgarh is the iron & steel hub of the country. The Bhilai steel plant of Steel Authority of India Ltd (SAIL) produces more than 3.153 million tonnes of saleable steel per annum.

Cement: Chhattisgarh has abundant limestone reserves that support a strong cement sector. Chhattisgarh accounts for around 5.4 per cent of the total limestone reserves in India.

Factfile

Capital: Raipur

Geographical Area (sq km):137,898

State Language: Chhattisgarhi, Hindi and English

Literacy Rate: 70.3 per cent

Key Industries: Mining, iron and steel, cement, power, IT and ITeS and Biotechnology

Aims and Object of the Project

CHHATTISGARH WESTERN REGION TRANSMISSION LIMITED (CWRTL) is laying 765 KV D/C transmission line vide Forest proposal No. Proposal No: FP/CG/TRANS/18820/2016.

Regional office Nagpur of Ministry of Environment, Forests and Climate Change (Forest Conservation Division) GOI vide their communication No. FC - II/CH-69/2017-NGP/2559 Dt. 21/9/2017 have inserted following clause to permit forest clearance.

Condition XXV - "The user agency in consultation with the State Government

shall create and maintain alternate habitat/home for the avifauna, whose nesting trees are to be cleared in this project. Bird's nests artificially made out of eco-friendly material shall be used in the area, including forest a r e a a n d h u m a n settlements, adjoining the forest area being diverted for the project;"

CHHATTISGARH WESTERN REGION TRANSMISSION LIMITED (CWRTL) 765 KV D/C transmission line has vide their Service Order (SO) No. 5700218434 asked Chhattisgarh Biodiversity Society to Provide consultancy service & to carry out survey for avifauna in forest & surroundings and to determine & submit project reports to provide alternate Re-habit for avifauna with artificially made eco-friendly materials.

The aims and objects of the project, are to carry out survey for avifauna in 22.182 Hect forest under the ROW of proposed Rajnandgaon Warora Transmission line in Rajnandgaon district and surroundings and to determine and submit project reports for providing of alternate Re-habit for avifauna with artificially made eco-friendly materials as per guidelines/ Schemes of Govt. of India Ministry of Environment & Forest.

Nests of most of the birds are lost in the felling of trees. Artificial nest mounts can compensate the loss to a great extent.

CHAMPA DHARAMJAYGARH TRANSMISSION LINE OF CWRTL

(TOTAL FOREST AREA 22.182 HECTARE APPROX)

Step by step procedural methodology

CHHATTISGARH WESTERN REGION TRANSMISSION LIMITED (CWRTL) is laying 765 KV D/C transmission line.

The project proposes to determine and submit project reports for providing of alternate Re-habit for avifauna with artificially made eco-friendly materials as per guidelines/ Schemes of Govt. of India Ministry of Environment & Forest.

The Methodology uses are as under.

- 1. Identification of the proposed area.
- 2. Planning and scheduling a through visit to the site along with experts of relevant fields. (Botanists, Avifauna experts, researchers etc.)
- 3. Recording acoustic samples for later reference.
- 4. Making sketches of the Flora/fauna of the region for exact identification.
- 5. Photographing the Avian and floral species of the proposed area to document and mitigate later.
- 6. Detailed data recording of the sightings as per scientific methods.
- 7. Detailed record keeping of the Geo-Sat. data for future reference.
- 8. Analyze the recorded statistical data collected in a proper scientific manner.

Analysis of the Data

The District Head Quarter of Janjgir-Champa is in Janjgir , which is situated on National Highway 49. Janjgir is 65 KM. away from Bilaspur and 175 KM from State capital Raipur through road route. District head quarter Janjgir is also connected with Rail Line of South-Eastern-Central Railway. It is situated on Hawarah-Mumbai main line. State capital Raipur is 152 KM. from Janjgir through Rail route. The railway station of district Janjgir is Naila and Champa.

The proposed laying of 765 KV Champa-Dharamjaygarh line, which passes through 22.182 Hect of forest of Janjgir lies in the Geo Sat coordinates of 22°16'5.32°N 82°45'33.29"E and 21°58'3.250°N 82°29'22.70°E.

The survey was done on Foot as well as in vehicle as was practically possible in the areal line of proposed 765 KV Champa-Dharamjaygarh line.

The Avian species found in the forest covered area and the non forest coverd area were recorded and analysed. The analysis of the data establised is as follows.

Cont.

List of Birds sighted at the proposed 765 KV Champa-Dharamjaygarh line site area.

S. No.	Common Name	Scientific Name	Family	IUCN

Deforestation and its impact and Mitigation Measures

REHABILITATION :

Although only 3mtr + 3mtr =6mtr. width area of 67 mts is being cleared for the proposed 765 KV Champa-Dharamjaygarh line, Chances of any Adverse impact on habitat not significant, It is likely that there is not any permanent damage to the water source in the affected area, therfore there is no need construct any permanent structure to harness water.

However the impact on Avifauna may be significant. Many natural abandoned nests may be found/recovered during clearing the passage for the aforesaid proposed line. these nests are of significant importance as they can be used to reinstate the species by experts. If nests are not abandoned and are still in use, can be rescued and shifted by experts as this is an important measure in conservation of Avifauna base.

ARTIFICIAL NESTS :

Although sucess rate of artificial nests is very low in open forest area, but this rate can be improved by using local material to build the artificial nest. Very few species have been reported to have accepted artificial nests, still if proper measures are taken there may be chances that birds accept the nests. Experience from the past can be of very great help.

NESTS AND THEIR TYPES :

During our study we noticed maybe due to global change in environment pattern and change/delay in monsoon this year only few of the migratory species had arrived, out of our estimated calculation about only 10% migratory species were recorded. (Detailed and extensive survey of the area may be required to achieve at a conclusive figure) Of the nests which were sighted/recorded about 55% of the nest were on Trees /canopy, 22% use natural/self made holes in trees, 14% on ground and rest on cliffs and human settlements. Following types of nests are suggested for installation as suitable places, based on the data acquired of the field survey as mentioned earlier.

- 1. Woden Box Nests
- 2. Old Natural tree trunks with bird nest holes
- 3. Wooden platforms for birds to build their nest upon
- 4. Clay nests according to the bird species
- 5. Boulder mounds in piles of gravels for birds which nests on ground
- 6. Nest in Bunds and walls of drenches for birds like kingfishers and bee eaters
- 7. Nests built by Bamboo twigs
- 8. Coconut shell nests

Nests and their Proposed types

S.No.	Family of Birds	Type of Nest
1	Accipitridae	Trees
2	Aegithinidae	Trees
3	Alcedinidae	Bunds
4	Anatidae	Ground
5	Ardeidae	Trees

3.	Wooden platforms	25
4.	Clay nests	250
5.	Gravels Nest	30
6.	Bamboo Nests	150

Compensatation, Suggestions & Recommendations:

In general, the word "compensation" means balancing one action (or its effects) with another action.

In nature conservation, compensation means balancing the negative effects in the environment with other activities that improve the state of the environment and restore its proper functions.

The compensation is always associated with some risk of failure. Therefore, in practice, incomplete quality is always compensated by the amount.

The surface on which habitats are restored must be larger than the site of the habitat that will be lost - only then the combined effect will be able to offset the losses.

The basic principle is that compensation needs to precede the compensated losses. where ever possible.

The Steps may include :

- » Habitat reclamation elsewhere
- » Improvement of the remaining resources of natural habitats
- » Habitat restoration
- » Creating new species habitats
- » Improvement of species' food base
- » Reduction of other threats for threatened species

CONCLUSION

Environmental compensation should always be an exceptional action, undertaken only when unable to avoid or minimize negative effects to an insignificant level. Therefore, the use of environmental compensation will never be substantial. Every case of compensation must be individually planned. Therefore, it is impracticable and impossible to propose any detailed standards of compensation measures.

Techniques that can be used in the compensation planning are specific to particular types of natural habitats and species, and even have to be specific to local situations. Naturally, the possibility of designing and implementing effective compensation in relation to different habitats and species differ.

Project proposal for Nest Installation

PROJECT REPORT FOR PROVIDING ALTERNATE HABITAT / HOME FOR THE AVIFAUNA, AS PER THE GUIDELINES OF MINISTRY OF ENVIRONMENT AND FOREST, GOVT. OF INDIA.

INTRODUCTION :

CHHATTISGARH WESTERN REGION TRANSMISSION LIMITED (CWRTL) is laying 765 KV D/C transmission line vide Forest proposal No. Proposal No: FP/CG/TRANS/18820/2016.

Regional office Nagpur of Ministry of Environment, Forests and Climate Change (Forest Conservation Division) GOI vide their communication No. FC - II/CH-69/2017-NGP/2559 Dt. 21/9/2017 have inserted following clause to permit forest clearance.

Condition XXV - "The user agency in consultation with the State Government shall create and maintain alternate habitat/home for the avifauna, whose nesting trees are to be cleared in this project. Bird's nests artificially made out of eco-friendly material shall be used in the area, including forest area and human settlements, adjoining the forest area being diverted for the project;"

In accordance with the aforesaid transmission line CWRTL has asked Chhattisgarh Biodiversity Society to do a survey work and compensate the loss to the avifauna base of the affected area.

CHHATTISGARH WESTERN REGION TRANSMISSION LIMITED (CWRTL)765 KV D/C transmission line has vide their Service Order (SO) No. 5700218434 asked Chhattisgarh Biodiversity Society to Provide consultancy service & to carry out survey for avifauna in forest & surroundings and to determine & submit project reports to provide alternate Re-habit for avifauna with artificially made eco-friendly materials.

OBJECT AND AIM OF THE PROJECT

The aims and objects of the project, are to carry out survey for avifauna in 22.182 Hec. forest area and surroundings and to determine and submit project reports Providing of alternate rehabitat for avifauna with Artificially made eco-friendly material as per guidelines/ Schemes of Govt. of India Ministry of Environment & Forest.

Proposed Area

Forest Between Parsada, Pahariya Village, Gatwa, Forest Between Gatwa Kandra Comp. 75, Chitapalli Forest Between Pantora Kanki, Pantora, Chitapalli, Bokramunda & Kandra

Methodology

The project proposes to determine and submit project reports for providing of alternate Re-habit for avifauna with artificially made eco-friendly materials as per guidelines/ Schemes of Govt. of India Ministry of Environment & Forest.

The Methodology uses are as under.

- 1. Identification of the proposed area.
- 2. Planning and scheduling a through visit to the site along with experts of relevant fields.
- 3. Recording acoustic samples for later reference.
- 4. Making sketches of the Flora/fauna of the region for exact identification.
- 5. Photographing the Avian and floral species of the proposed area to document and mitigate later.
- 6. Detailed data recording of the sightings as per scientific methods.
- 7. Detailed record keeping of the Geo-Sat. data for future reference.
- 8. Analyze the recorded statistical data collected in a proper scientific manner.
- 9. Detailed report has been prepared and submitted.

Duration of execution

Prelimary Data collection work has been completed and based on our findings a detailed comprehensive project has been created for the installation of artificial nest for the avifauna present in the Proposed 765 Kv Champa Dharamjaygarh Transmission Line (Area 22.182 Hec. approx.)

Duration shall be of six months form submission of this report, for visits to the field, data collection, and nest installation with preparation of Final Report. Which will be submitted in 06 (Six) copies to the relevant authority.

Prerequisites for the project

A Work order

Advance funds to the tune of 50% of the total cost of the project to initiate the nest installation work.

The relevant authority shall cooperate in technical matters as and when required.

All necessary clearances, entry permits/fees and lodging and boarding including transportation and logistics costs/fees are to be borne by the relevant authority, and ensure every possible assistance in execution of the project.

A staff preferably knowledgeable about the nature of work shall be provided by the relevant authority.

Nests required to compensate the Loss

S. No.	Type of Nest	Qty.
1.	Wooden Box Nests	60
2.	Old tree trunks (On availibility)	40
3.	Wooden platforms	25
4.	Clay nests	250
5.	Gravels Nest	30
6.	Bamboo Nests	150

Financial Projections

S. No.	Details	Amount
1.	Consultancy charges	2,00,000/-
2.	Transportation/Logistic/Boarding etc	3,75,500/-
3.	Project execution including office and feild expenses	3,20,500/-
4.	Cost of Artificial Eco-friendly nests & installation	6,64,000/-
5.	Other Expenses	1,00,000/-
	Total	16,60,000/-

Conclusion

We at Biodiversity Society of Chhattisgarh are deeply indebted to Champa Dharamjaygarh Transmission Line of CWRTL for awarding us the do a survey work and compensate the loss to the avifauna base of the affected area.in its laying of 765 KV D/C transmission line in 22.182 Hec.

Our team was pleased to do the Survey and nest installation work and we had full co-operation from the staff of CHHATTISGARH WESTERN REGION TRANSMISSION LIMITED (CWRTL) and we expect to complete our work well within our time-frame.
