

KODERMA FOREST DIVISION

RECOMMENDATION

Many Stone Mines are being operated in the adjoining area and there is a regular threat of illegal mining on the proposed forest land. In fact, many incidences of illegal mining has been found in the past for which legal action has also been taken. The area is also devoid of tree cover and there is very poor vegetation thereon.

With the sanction of this project, the menace of illegal mining will be checked in this area. Moreover, as there is very poor vegetation on the proposed site, there will be minimum loss to the environment also.

So, this proposal is recommended to be sanctioned in the light of above mentioned facts.

**Divisional Forest Officer,
Koderma Forest Division.**
