Subject: - Recommendations

The project is recommended because the area to be diverted is small area of 0.3 ha and the trees required to be felled are 116 only (broad leaved). The road project will not have any major impact on flora and fauna of the area. Mitigation measures in the form of Compensatory Afforestation plan over 10 ha forest area has been proposed to mitigate the environmental loss due to the project. The road is of local importance and is therefore recommended that the road may be cleared under the Forest (Conservation) Act, 1980.
