

Site Inspection Notes of the Wildlife Warden, Hosur

Name of the Project : Diversion of 0.315 ha of forest land in Woddapatti and Biligundulu Reserve Forests for laying OFC in Dharmapuri – Anchetty route Hogenakkal stretch.

Inspected the proposed site on 22.12.2020 with the Forest Range Officer and staff of Anchetty Range. The proposal for diversion under FC Act, 1980 for laying of underground Optical Fibre Cable (OFC) to improve communication networking 4G facility to an extent of 0.315 ha is a linear project and it is proposed along the stretches of Dharmapuri - Anchetty route Hogenakkal stretch, which is passing through the Woddapatti and Biligundulu Reserve Forests of Anchetty Range. However, the proposed alignment of the laying of OFC is along the side of the already existing black topped road from Hogenakkal to Anchetty. The OFC is proposed to be laid underground alongside of the road by way of digging trench of size 0.3m width and 0.60m depth.

The alignment of the proposed OFC does not lead to any felling of trees or disturbance to the landscape and there would be no disturbance to wild animals.
