

SITE INSPECTION REPORT

The proposed site for diversion of forest land for laying of transmission line was inspected on 02.03.2020 along with the Divisional Forest Officer, Ranchi and the representatives of the User Agency. The undersigned visited Mauza- Muna of the Ranchi Division for test check.

The forests comprises of Sal, Asan, Gamhar, Dhowda and other Sal associates. The density of vegetation is 0.8.

The forest land proposed is prone to erosion. Hence it needs soil conservation plan. Elephant, sloth bear, spotted deer, leopard, porcupine, pangolin are the major wildlife present in the forest area proposed for diversion. Hence wildlife management plan should be prepared.
