

**SITE INSPECTION REPORT OF GHAGAR SAND, GRAVEL &
BOULDER MAHAL.**

The mahal site of Ghagar Sand, Gravel and Boulder mahal within Dullung R.F. was inspected by me on 06-12-2018 and report thereof furnished as under:

During my inspection, no any rare/endangered/unique species of flora and fauna were found in the area. Further, no archeological/heritage site/defence establishment or any other important monument is located in the area.

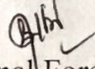

Total area of Lakhimpur District is 2277 Sq. Km. And population of District is 10,42,137. The District is very backward in infrastructure Development and huge development thrust is in process. So, to meet the requirement of raw material for infrastructure development of Lakhimpur and Majuli District, the mining area is to be opened.

In addition to the above, to meet the local demand for Stone/Boulder & GSB it is pertinent that the Mahal/MMC Area needs immediate opening for mining.

Further, there is no violation of the Forest Conservation Act 1980, reported as on date.

Date :

Place: Lakhimpur (Assam)

Divisional Forest Officer
Lakhimpur Division
North Lakhimpur.
