

RECOMMENDATION OF THE CONSERVATOR OF FORESTS

Oil India Ltd. is a public sector devoted to exploration & production of oil and Natural Gas. Production of oil is of immense importance to the Govt. from both economic and defense angles. Production of oil benefits the state as well as the Central Govt. as it earns substantial royalty. Local inhabitants benefited greatly from the growth of oil production specially to get jobs in Oil and to develop small scale industries from the product of refinery of oil. The diversion requires minimum R.F. land which is unavoidable from technical point of view.

I therefore recommend the diversion proposal of Oil India Ltd. 3.545 Ha. In Mesaki R.F. (MKD) which may kindly be accepted.
