

## Joint Inspection Report

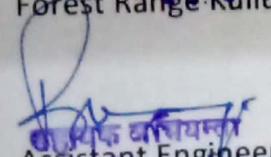

The joint inspection of the site for diversion of 0-26-48 hectare of forest land for the construction 33/11 KV Sub Station Raison (Raugi Nal) was carried on dated 27<sup>th</sup> August, 2014.

The user agency has proposed three different sites. In 1<sup>st</sup> site total 0-26-48 hectare of forest land is involved with least number of trees getting affected. In 2<sup>nd</sup> and third sites along the right bank of river Beas are rejected due to thick forest and more over the right of way for proposed 33 KV HT line and 11 KV HT line is not feasible. Since at 1<sup>st</sup> site right of way problem for 33 KV and 11 KV HT line is not involved and least forest land and least number of trees are involved. Hence the 1<sup>st</sup> site has been finalized and the 2<sup>nd</sup> and 3<sup>rd</sup> sites has been rejected by the Joint Inspection Committee.

There is no scope of avoidance of forestland. However all efforts have been made to minimize the use of forestland. The diversion of 0-26-48 hectare of forestland is bare minimum and cannot be escaped.

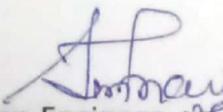

The Joint Inspection Committee therefore recommends diversion of 0-26-48 hectare of forestland (revenue details enclosed herewith) under section 2 of Forest Conservation Act (FCA) 1980.

## Joint Inspection Report

### Corrigendum

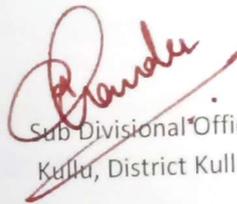

The joint inspection of the site for diversion of 0-26-48 hectare of forest land for the construction of 33/11KV Sub Station Raison (Raugi Nalla) was carried out on dated 27<sup>th</sup> August 2014. The joint inspection committee had recommended diversion of 0-26-48 hectare of forest land under section 2 of forest conservation Act(FCA) 1980.

The user agency now said that the diversion of forest land is required to 0-26-46 hectare only whereas all other scope and site proposed will remain same.

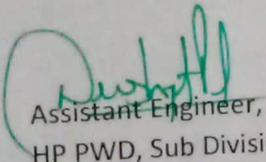

The joint inspection committee therefore recommends diversion of 0-26-46 hectare forest land under section 2 of Forest Conservation Act (FCA)1980.
