

UNDERTAKING FOR TRANSLOCATING SAPLINGS

Certified that 108 Saplings of broad leave species with respect to Kunihar Forest Division are coming in the road alignment proposed for diversion. Although the numeric quantum of saplings is quite minimum against their spatial distribution i.e., spread over approximately 15 Km length of proposed road alignment; but, translocation of the same prior to commencement of work by the User agency will be done by Forest Department through UA as per the suitability of habitat.
