

Annexure B

The District revenue department had given records of available site as follows after the request:

1. Site A (Proposed site)-2.42 ha area
2. Alternate site B-1.06 ha area
3. Alternate site C- 0.65 ha area

Details are uploaded in KML files already.

Site A (Proposed site)- The minimum area requirement is 3.42 ha. For National centre of excellence. The justification in that regard has already been submitted earlier. The proposed site with areas 2.42 ha. has 219 no. of trees(approx..). the site is categorised as **UPF in forest records**. Further site has more no. of trees like mango, pipal etc. the no. of chir pine are low. The site is with approach road available and connectivity.

The alternate site B- The alternate site B is with area=0-81-01, 1.06 ha and having 229 number of trees (approx). The site is categorised as **D PF as per records**. Further the no. of chir pine is more compared to Site A. The bare minimum area requirement cannot be satisfied in this site for NcoE. Direct road connectivity is not available. Hence the Alternate site B is rejected.

The Alternate site C- The alternate site C is with area=0-45-30,0.6576 ha and having 221 number of trees(approx). The site is categorised as **DPF as per records**. Further the no. of chir pine is more compared to Site A. The bare minimum area requirement cannot be satisfied in this site for NcoE. Direct road connectivity is not available. Hence the Alternate site C is rejected.

In conclusion, it is decided that to save the number of trees to be cut for clearance; the proposed site A which is with lower tree density and categorised as UPF is selected for proposed project. Further crucial point of minimum area required can be almost satisfied by Site A only. Hence, Alternate Site B and Alternate Site C are rejected while noting the higher no. of trees, DPF categorisation, road connectivity and minimum area requirement criteria
