## **Detailed scheme for Compensatory Afforestation to be carried out in lieu of 11.371 hectares of forest area proposed to be diverted for Construction of By-pass Road under Bolangir R & B Division.**

National Highways (NHs) 26 and 57 pass through Balangir town. Due to lack of a bypass / ring road and heavy traffic is witnessed in the town area. The existing NH-26 alignment traverses through Bolangir town with improper road geometries and inadequate formation width. Built up area being located on either side of the road; the roads do not have adequate drainage facility or scope to widen the road to standard two lane. The main aim is to propose bypass alignment for Bolangir to decrease the commercial traffic load from Village Bijakhman to NH-57 & NH-26 from 0/0KM to 7/700 KMs in the west side of Bolangir Town. Vehicles carrying commercial product, agricultural product and heavy mines ply through Bolangir Township as there is no alternate arrangement for diversion of the traffic. According to the proposal, work was to be implemented in two phases. In the first phase a 12-km road was to be built from Biramunda village near NH 26 to Bijakhman on NH 57 (Titlagarh Road). The PWD, NHAI and the IDCO were entrusted with the task for construction of the road. The IDCO has completed its first phase construction of the road and work has been stopped at the foothills of the Chandili Hill near Sadeipali, 4.5 km from Sambalpur Road. The remaining 7.5 km road from Sadeipali touching IDCO road via Medical College and Kendriya Vidyalaya to reach the NH-57 at Bijakhman of Balangir-Titlagarh road will be constructed by Public Works Department. Now Balangir R & B Division has applied Forest Diversion Proposal over 11.371 Ha of Forest land and 10.934 Ha of non- forest land along with authenticated land schedule, DGPS maps and all concerned document vide Proposal No: FP/OR/Others/7344/2014 for approval u/s 2 of Forest (Conservation) Act. In the process of acquisition of land for construction of the proposed Bolangir Bypass as above, diversion of 11.371 ha of Forest land. 3.358 ha of Revenue Forests at Sadeipali, Dhumamara and Gendhrel Village and 8.013 ha of Reserve Forest land in Kadalimunda and Khersel RF needs to be diverted as bare minimum necessity for the project. The present scheme is an outcome of the adherence to the Para-2.4 (vi) of Forest Conservation Act, 1980 and Forest (Conservation) Rules, 2003 (Guidelines & Clarifications) by the Government of Odisha, Forest and Environment Department. As per the instructions, the Divisional Forest Officer is empowered to demand the cost of plantation for taking of compensatory afforestation in lieu of diversion of Forest land equal to 1000 saplings per ha over the stretch of forest land diverted. The entire stretches of the road have been covered to ascertain the number of trees to be felled from both side of the road. As per the enumeration list a total of 2701 Nos of trees will be felled in the process. As against diversion of 11.371 ha Forest land, Compensatory Afforestation will be taken up over 22.908 ha of suitable degraded Revenue Forest land @ 1000 Nos of saplings per ha coming to total 22908 Nos of saplings. User agency has already identified one patch totaling to 22.908 ha which will be handed over to the Forest Department.

The proposed CA land has been identified and Plantation will be taken up in Pandrapita Village. Degraded Forest Land under Bolangir Forest Range over a stretch of 22.908 ha out of the gross area of 23.226 ha provided by the User Agency in one patch. Further, necessary alienation proposal has also been submitted to the Tahasildar, Bolangir vide this office letter No. 1024, Dtd. 04.02.2022 (Copy enclosed with Scheme). Besides, the individual patches of total CA land allotted in Pandrapita villages was examined through Decision Support System and the analysis is given as below:

Name of Mouza / Village	Khata No.	PlotNo.	Kissam	DSS Result		Area for compensatory Afforestation in Ha.
				Open Forest or Non-Forest area in ha	MDF Area in ha	
PANDRAPITA	84	54/916	BADA JUNGLE	0.425	0.00	0.425
PANDRAPITA		81/917	BADA JUNGLE	0.711	0.00	0.711
PANDRAPITA		81/918	BADA JUNGLE	1.624	0.00	1.624
PANDRAPITA		116(P)	BADA JUNGLE	1.455	0.00	1.455
PANDRAPITA	82	81	GRAMYA JUNGLE	18.693	0.00	18.693
<b>TOTAL</b>						<b>22.908</b>

Considering the results of DSS and observations during field verification, the CA scheme over 22.908 ha is now revised at the Current wage rate. Details of the CA scheme is given as under and the model of plantation will be taken up as 1000 plants / ha to compensate the loss of the trees in the area proposed for diversion. The DSS result is enclosed as **ANNEXURE-A**

Name of the village	Type of Plantation	Area in ha	No. of seedlings to be planted per ha	Total no. of seedlings to be planted
Pandrapita	Block Plantation @ 1000 Plants / ha	22.908 ha	1000	22908

The site-specific scheme is therefore prepared and its details are furnished below: -

### 1. Details of non-forest land: Enclosed as **Annexure-B Series**

The village maps showing the land details for the proposed compensatory afforestation are enclosed as Plate No. I & II. The joint verification reports of the non-forest land duly authenticated by Forest and Revenue authorities are enclosed as **Annexure-B Series**. Key Plans of CA area shown on topo sheets are enclosed as **Annexure-C Series**. GPS co-ordinates of survey stations of Compensatory Afforestation area are furnished as **Annexure-D Series**.

### 2. Description of Area

- I. **Whether the site selected for Compensatory Afforestation is a land bank or not:** This identified non-forest area is under the control of Revenue Department and classified as 'Bada Jungle'. It is not a land bank.
- II. **If the CA site is other than the land bank, reasons be given:** No land bank has been established yet for this purpose.
- III. **In case of non-forest area identified for CA, then what is the distance of CA site from the adjoining forest boundary:** Land selected for the CA is a Revenue Forest land classified as 'Bada Jungle'.

IV. **Soil type:** The soil type as found in the CA patch is shallow, excessively drained, gravelly loamy soil on moderately hill slopes with loamy surface, On the whole, the soil of the tract generally has a higher content of clay and the lime concretion is found mixed with the soil. The higher clay content of the soil makes it crack during summer and sticky during rains.

V. **Topography:**

- a) **Hilly/Undulating/Plain:** The Compensatory Afforestation sites are undulating but not much hilly.
- b) **Slope: Steep/Medium/Gentle:** The sites selected for Compensatory Afforestation have medium to gentle slope.
- c) **Whether the area is bearing any root stock of vegetation:** The sites selected for Compensatory Afforestation are either barren or with weed growth like *Lantana*, *Eupatorium*, *Woodfordiafruticosa*, *Combretumdecandrum*. Root stock of any principal species like Sal is not available.

**3. Plantation Model:**

The species for each site shall be decided basing on the existing physical growth in adjoining area, characteristics of trees foliage pattern, growth rate, branching pattern, soil characteristics and condition of the strip like water logged areas etc. Evergreen trees of tree that retains foliage for long time should be preferred over deciduous trees. AR Plantation @ 1000 plants per ha cost norm is furnished as **Annexure-E**. Plantation scheme has been prepared incorporating planting of 18 months old seedlings along with cost of transportation as per the One-time cost norm of Principal Chief Conservator of Forests & HoFF, Odisha communicated vide Office Order No. 1109/9F (Misc)-387 / 2021, Dtd. 08.11.2021. In this case pit size has been enhanced from 30 Cm<sup>3</sup> to 45 Cm<sup>3</sup> to accommodate bigger size 18 months old seedlings with (12"x10") poly bags properly inside the dugout pit.

**4. Technical details: Technical details of Compensatory Afforestation Scheme are as follows:**

a) **General Details:**

**Survey & Demarcation of boundary:** The identified area will be surveyed by DGPS and the area will be demarcated with RCC pillars of size 2.5 mtr x 30 cm x 30 cm. This work will be done by the User Agency at Project cost.

**Fencing:** To protect the plantation from grazing and other biotic interference, it will be provided with Concrete Pillar with Chain Link fencing, the cost for which will be paid by the User Agency. The fencing will be done around the entire patch as per the cost norm provided by the PCCF, Odisha vide Guideline dt. 08.11.2021, the length of fence needed in this project is furnished below:

Sl. No	Village	Length of outer periphery of the site in RMT	Length of common fence of adjoining project which need not be fenced	Total length of fence in KM
(1)	(2)	(3)	(4)	(5)
1	Pandrapita 54/ 916, 81/ 917, 81/ 918, 116 (P) of Khata No. 84 and Khata No. 81 of Khata No.82	3270	0.00	3.27
<b>Total</b>		<b>3270</b>	<b>0.00</b>	<b>3.27</b>

Estimate for Chain link fence has been provided in **Annexure – (F)**

**Planting and post-planting:**

b) Core Block plantation shall be taken up with 1000 plants per hectares at suitable spacing All post planting measures like casualty replacement, soil working, manuring, fire protection etc. will be undertaken. The plantation area should be divided into 4-hectare plots. These plots should be demarcated in the field before digging of pits so that the demarcating line does not cross a plantation row. The 4.0 ha plots should be shown on map. Cost norm for Block plantation @ 1000 plant / ha is furnished as **Annexure-E**.

c) While taking up plantation, the following vital points shall be taken up for consideration: -

- Care to be taken to raise healthy palatable seedlings of minimum 60 cm height. 10% extra seedlings are to be raised for replacement of casualty.
- Pitting shall invariably be done during November-February i.e., before onset of monsoon. If possible, the soil of upper portion and lower portion of pit should be placed separately in specific direction so that while planting the pits will be filled with top-soil first.
- Planting shall be done on the onset of monsoon to get full benefit of monsoon rain and planting should never be delayed.
- Basal dose of 50 grams of NPK and 5 grams of Chlorpyrifos dust per plant should be applied at the time of planting carefully by mixing with top-soil so that the roots of seedlings do not come in direct contact with fertilizer.
- In case of any mortality of planted seedlings, it should be replaced with good seedlings as soon as possible for better success rate.
- Complete weeding in proper time will be done. Strip weeding will not be permitted.
- Soil-working and application of 2<sup>nd</sup> dose fertilizer of 50 gms NPK per plant should be done in time.
- Since the area is provided with chain link fencing watch & ward will be easier and the watchers may be engaged in weeding in problematic areas along with watch & ward.

d) **Species:** Although indigenous species are to be preferred in the plantation, considering adverse soil & moisture conditions we may go for hardy exotic species which ever required so that the plants are able to survive. For success of plantation in interior tribal areas, plantation of fruit and NTFP species plays a great role since economic species have a little value for local people. Considering the topography, soil and moisture availability of the plantation area, the following species will be planted:

Sl No	Name of species	Common name	Remarks
1	<i>Azadirachta indica</i>	Neem	
2	<i>Derris indica</i>	Karanja	
3	<i>Emblica officinalis</i>	Amla	
4	<i>Terminalia chebula</i>	Harida	In lower areas with good soil depth
5	<i>Terminalia bellirica</i>	Bahada	In lower areas with good soil depth
6	<i>Dalbergia sissoo</i>	Sissoo	In lower areas with good soil depth
7	<i>Gmelina arborea</i>	Gambhari	In lower areas with good soil depth
8	<i>Dendrocalamus strictus</i>	Salia bamboo	In lower areas with good soil depth healthy seedlings from rhizomes may be planted
9	<i>Cassia siamea</i>	Chakunda	In lower areas with good soil depth
10	<i>Tamarindus indica</i>	Tentuli	In lower areas with good soil depth
11	<i>Madhuca indica</i>	Mahul	Only two years old seedlings may be planted
12	<i>Simarubaglauca</i>	Simaruba	In rocky areas with low soil depth

13	<i>ZizyphusMauritania</i>	Ber	In rocky areas with low soil depth
14	<i>Tectonagrandis</i>	Teak	Potted seedlings from pre-sprouted healthy stumps will be planted
15	<i>Mangiferaindica</i>	Mango	In situ plantation (direct placing of mango stone in planting site) during pre-monsoon may be adopted in few lower areas or where watering can be done during summer
16	<i>Caryotaurens</i>	Salapa	
17	<i>Terminaliaarjuna</i>	Arjuna	Planted only on nala bank or near water.
18	<i>Desmodiumoojeinensis</i>	Bandhan	
19	<i>Dilleniaindica</i>	Ou	To be planted in area having good soil depth
20	<i>Feronialimonia</i>	Kaitha	
21	<i>Ficusbenghalensis</i>	Bara	
22	<i>Ficusracemosa</i>	Dimiri, Dumer	
23	<i>Ficusreligiosa</i>	Aswattha	
25	<i>Phoenix sylvestris</i>	Khajuri	
26	<i>Pithecolobiumdulce</i>	Simakayan	
27	<i>Acacia catechu</i>	Khair	
28	<i>Acacia nilotica</i>	Babul	
29	<i>Artocarpusheterophyllus</i>	Jack fruit	
30	<i>Bauhinia variegata</i>	Kuler	
31	<i>Boswelliaserrata</i>	Salai	
32	<i>Brideliaretusa</i>	Kasi	
33	<i>Buchananialanzan</i>	Char	
34	<i>Calophylluminophyllum</i>	Polanga	
35	<i>Cassia fistula</i>	Sunari	
36	<i>Ceibapentandra</i>	White silk cotton	
37	<i>Chloroxylonsvietiana</i>	Bheru	
38	<i>Cleistanthuscollinus</i>	Karada	
39	<i>Albizialebbek</i>	Siris	
40	<i>Albiziaprocera</i>	White Siris	

#### d) Soil and Moisture Conservation Works: -

Since most of the area is undulating and slightly hilly various SMC measures should be constructed as provided in the cost norm. Estimate for various SMC measures like staggered trenches and loose boulder check dam.... etc. has been provided in the **Annexure- (G)**. The details of plantation and SMC measures proposed are given as under:

Sl. No.	Area in Ha	Plantation model	Cost of Plantation in Rs. per Ha.	Total Plantation cost in Rs.	Cost of SMC Measures in Rs. per Ha.	Total cost SMC measures in Rs.
1	22.908	Block Plantation @ 1000 Plant / ha	258777.00	5928063.516	39284	899917.872
<b>Total</b>				<b>5928063.516</b>		<b>899917.872</b>

So, the cost of SMC measures amounting Rs. **899917.872** is 15.18 % of the total plantation cost of Rs. **5928063.516**.

**Protection of the plantation:** Chain Link wire mesh with Pillar will be provided all along the periphery of the plantation. Few watchers will also be engaged for protection of the plantation. The cost norm of the Chain Link fence is furnished as **Annexure-(F)**.

**e) Watering:** - In order to make the plantation sustainable and permanent assets against the harsh climate of the Bolangir which confront with continuous dry spell and mercurial level as high as 45 to 48 Degree during Peak May, it is badly essential for making a watering provision to the plantation. Keeping the above in view a watering provision of the Model-W-III prescribed by the

Principal Chief Conservator of Forests & HoFF, Odisha has been proposed in the scheme. The detail of Cost Norm is furnished in **Annexure-H**

**5. Proposed Monitoring Mechanism:** The scheme shall be executed by the Divisional Forest Officer, Bolangir Forest Division with his staff and all prescribed records are to be maintained. In addition to internal monitoring by Forest Officers of State Government, a Monitoring Committee under item no. 3.4(iii) of consolidated guidelines under F.C Act 1980 issued by MoEF, shall be established with a nominee of the Central Government to oversee that the stipulations, including those pertaining to Compensatory Afforestation are carried out.

**Total cost of the project:** The total cost of the project is Rs **24793500/- (Rupees Two Crore Forty-Seven Lakh Ninty Three Thousand Five Hundred)** only as detailed in **Annexure-I** which shall be payable by the user agency to the State CAMPA Accounts through online.

  
**Divisional Forest Officer**  
**Bolangir Forest Division**

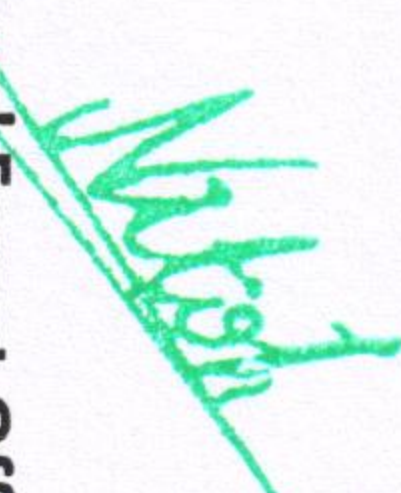

**ANNEXURE-A**

**CERTIFICATE ON DSS ANALYSIS FOR CA / ACA / PCA**

This is to certify that DSS Analysis of Land identified for CA/ ACA/ PCA over 22.908 ha in lieu of diversion of 11.371 ha of forest land for construction of Bolangir By-pass road by R & B Division, Bolangir and subsequent ground truthing have been done. The Outcome is as mentioned below:

Sl. No.	Name of the Range	Name of the Forest Block (R/PR/PP/DPF/Re venue Forest)	Area identified for CA/ ACA/ PCA (In Ha.)	Classification of identified land in Percentage of Total ha							Area suitable for plantation in percentage of Total ha				Plantation Model (AR/ ANR)	Remarks
				Very Dense Forest	Moderately Dense Forest	Open Forest	Non-Forest	Scrub	Water	Total	Open Forest	Non-Forest	Scrub	Total		
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17

# OFFICE OF THE TAHASILDAR, BALANGIR

Letter No. 1740 / Date 21.05.22

To

The Superintending Engineer  
Balangir (R&B) Division.

Sub:

Regarding identification of 56.48 acres degraded forest land for forest diversion proposal of Bypass road (West side).

Ref:  
Sir,

Your office letter No. 321 Dt. 25.04.2022.

In inviting a kind reference to the subject cited above, I am to intimate that an area of Ac.56.48 dec. of the degraded forest land selected for compensatory afforestation vide this Office Letter No.342 dt.28.01.2022 coming under Pandarapita village of Khujenpali R.I. Circle. The Plot No.81 is recorded to an extent Ac.49.92dec. as per RoR. But as per DGPS survey particular plot measured to Ac.46.91 dec. as per Letter no.321 dt. 25.04.2022 of Assistant Executive Engineer, Balangir R&B, Sub-Division No-II, Balangir. Hence the extra land of Ac.3.729dec. is allotted from the Plot No-116, Holding No-82, Mouza-Pandarapita as per the land schedule mention below.

## Land Schedule

Mouza - Pandarapita  
PS - Balangir, No. 132

Holding No.	Plot No.	Kissam	Total Area	Mark	Area for Proposal
82 (Rakhit)	81	Gramya Jangal	Ac.49.92dec.	Full	Ac.46.191dec.
84 (Abada jogya Anabadi)	81/918	Bada Jangal	Ac.3.90dec.	Full	Ac.3.90dec.
	81/917	Bada Jangal	Ac.1.70dec.	Full	Ac.1.70dec.
	54/916	Bada Jangal	Ac.1.85dec.	'A'	Ac.0.96dec.
	116	Gramya Jangal	Ac.84.32 dec.	'A'	Ac.3.729dec.
Total			Ac.141.69dec.		Ac.56.48dec.

This is for your kind information and necessary action.

Yours Sincerely,

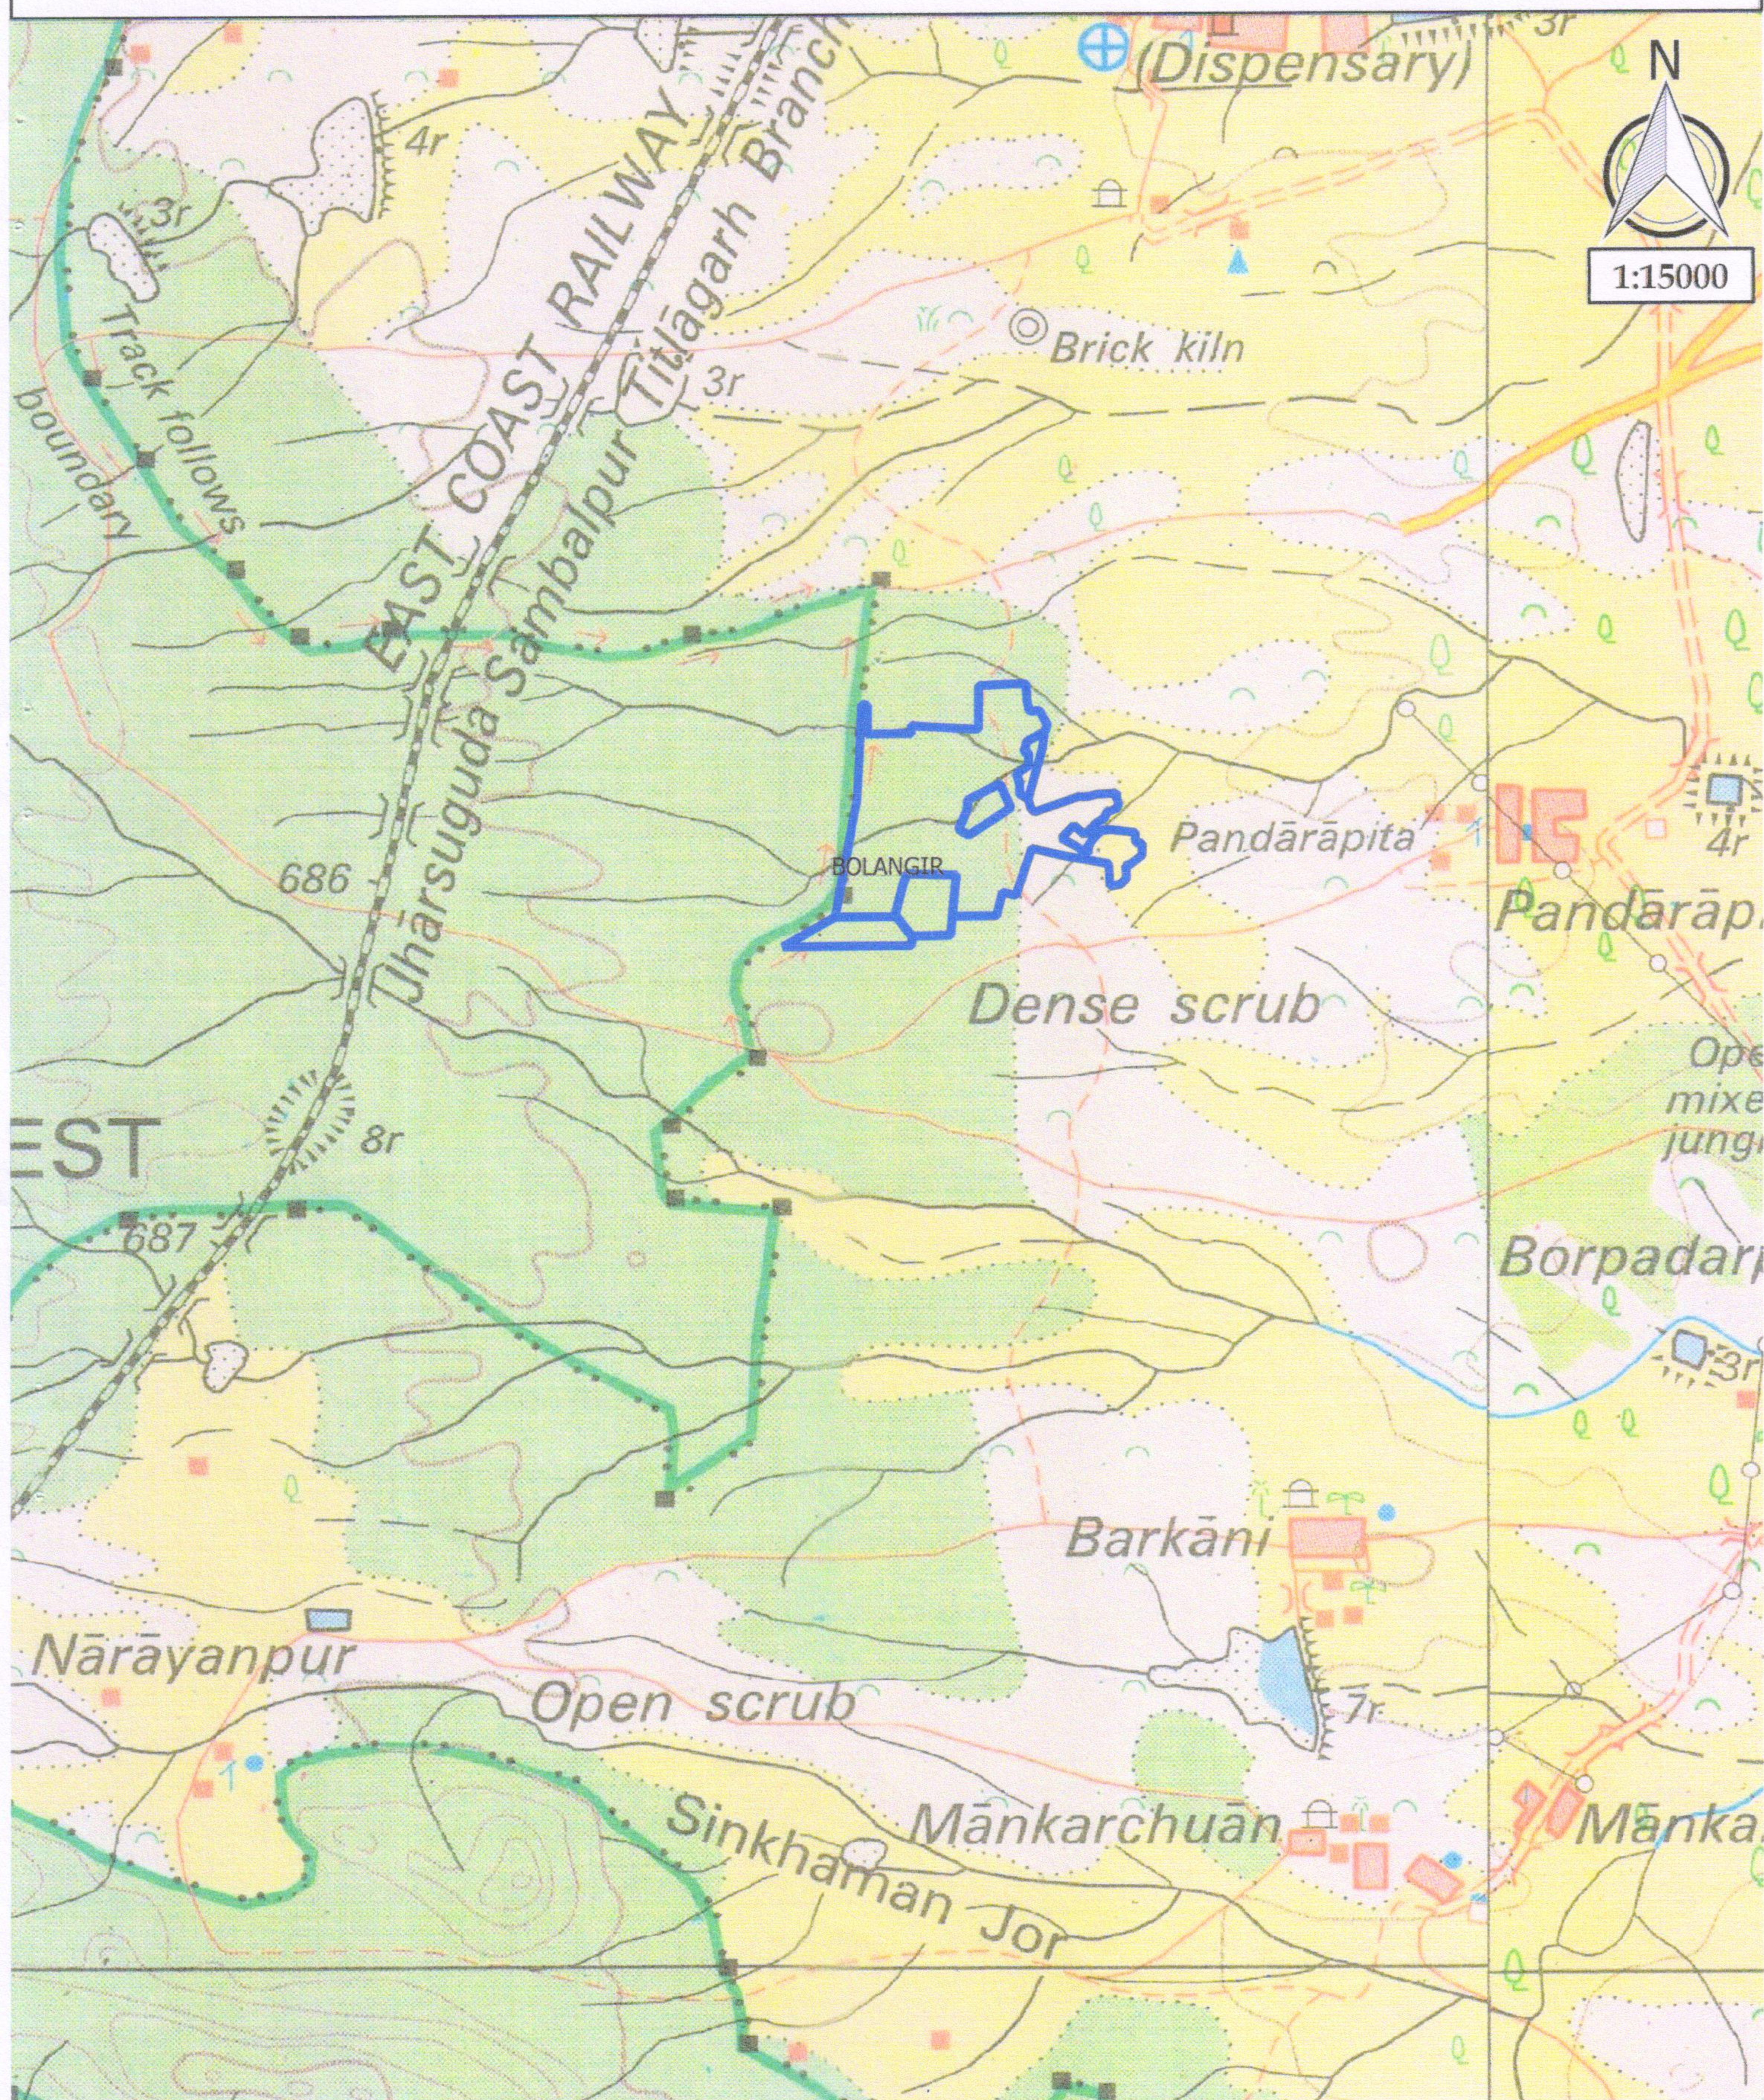

Tahasildar, Balangir

Memo No. 1741 Dt. 21.05.22

Copy submitted to the DFO, Balangir Forest Division, Balangir/ Collector & District Magistrate, Balangir for favour of kind information and necessary action.
