To resolve the Query raised by Nodal officer, Chhattisgarh, Site Survey Work has been carried out to explore the route suggested to avoid the Reserve Forest area for laying of 765kV Raipur-Jharsuguda Transmission Line in Chhattisgarh State.

Observation of Re-Survey work:-

1. Existing 2 No. of 765kV Extra High Voltage line of PGCIL are already passed through the available corridor by avoiding Reserve Forest area.
2. Existing 1 No. of 132 kV Line of CSPTL has already passed through the available corridor by avoiding Reserve Forest area.
3. For laying the OGPTL line by avoiding forest area is not feasible due to Technical constraints i.e. non-availability of adequate corridor for route alignment, Existing Transmission Lines (3 No.), Mining area. Also in the proposed corridor there were densely thick habitant area of RABO village in nearby corridor.

Conclusion:-

Based on the output from the above re-survey activity, we were having no other option left, except to enter in reserve forest area & also the alignment was made in such a manner that very minimum forest area effected and having bare minimum forest length.

Keeping the above in view, we are hereby requesting to approve the Forest diversion proposal with existing route.
