Important(s):-

1. Area statement doesn't include *Revenue forest area* and *Corporation compartments*.
2. Projection System used for area calculation is *WGS_1984_UTM_Zone_44N*
3. Few compartments listed in our area statement are not intersected by the Fiber line in the map due to possible shift between Survey data and our shapefile. It could be due to difference in source and projected co-ordinate system of data. So if difference occur, field survey data should be followed.
4. Map is for reference purpose only. No survey should be performed based on this.
