

**OFFICE OF THE EXECUTIVE ENGINEER
WATER RESOURCES DIVISION KHANDWA (M.P.)**

Clarification of queries dated 27.10.2017

- 1) Previously in C (ii) (a), 05 patches were mentioned with details as

Patch No.	Area of patch (in ha.)	Area of patch shown in KML file
1	33.17	33.17
2	7.77	7.77
3	6.81	6.81
4	21.1	101.00
5	79.9	101.00

as patch no. 4 & 5 are in continuation i.e. may be treated as one patch, and the observation was regarding mismatch of area shown in column no 2 and area shown in KML file in column no. 3, these two patches are now combined in a single patch of area 101.00 ha. Patch no. 4.

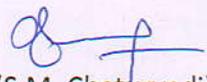

In Sr. no. 1, 2 and 3 of KML file, patches were shown with colored outer line, as the area of revenue land (Chhote -bade jharh ka jungle) comprises of 53 survey no. in Rajgarh Village, 03 survey no. in Semliya Village and 05 survey no. in Barar Village. It was somewhat confusing; now these polygons are filled with light yellow color and show clearly the shape of polygon.

2) D (i) Due, to single file capacity against column D (i) only single file i.e. Toposheet and alternative site comparison is visible, justification is given in **additional information** details.

3 K (i) Affected forest land is only 101.00 ha. (Green colored in KML file) that is why F.R.A. for 101.00 ha. land is attached, 47.75 ha. land is revenue land (Chhote- bade jharh ka jungle) (Yellow in KML) for which F.R.A. is not submitted.

Submitted for kind perusal *please*

with regards.

(S.M. Chaturvedi)
Executive Engineer
