

Clarification regarding patch KML file in Balasore WL Division

Sono Barrage is a **Hybrid** type of project. Pondage is a part of **Patch** while canals are part of **Segment (linear)**. Sono Irrigation Project is spreading over two districts (Mayurbhanj and Balasore) as well as in two forest divisions (Baripada and Balasore WL). The canal (Segment/Linear) portion is spread in both districts and forest divisions. But the pondage (patch) is only confined to Mayrubhanj Distrct/Baripada Forest Division, there is not any patch area in Balasore WL division.

While online filling of the proposal, there is not any option for mentioning "**No or Zero**" patch in Balasore division. So we have written Patch Area in Balasore equal to 0.00 ha and upload a **dummy KML file with no area** to complete the online submission proposal.
