Justification
For Dust Free Conveying

M/s JSW Steel Ltd is installing pipe conveyor for transporting iron ore from JSW Nandihalli railway yard to JSW Steel plant. The 21.404 Km long conveying system is customized to fit into the local environment. Since the system is completely enclosed, no material can fall over the forest area, water retained in dam area & cultivation land. Absolutely no dust is released into the air, which greatly benefits the environment. Furthermore, the conveyor is economical in operation, energy-efficient and maintenance-friendly.

The whole point of pipe conveyor over conventional conveyor is to avoid dust generation by forming a closed conveying system.

For JSW Steel Ltd.

Authorized Signatory.
