Power line with pylons surveyed, with poles unsurveyed

REFERENCE

AM 73 National Highway No. 73

NOTES -

- Heights are in metres and above Indian mean sea level. Contours are approximate. A white height e.g. 75, represents the approximate height, in metres, between the top and bottom of a steep slope. Tables shown on this sheet are usually compiled from July to March. Tables are shown throughout the sheet, only the important ones have been shown. Unmetalled roads and cart-tracks in this sheet are generally metalled in dry season. Permission to use these roads is required from the irrigation authorities. Canal distance stones are 1500 feet apart and every fifth station stone is shown. The area adjoining the Yamuna River is liable to change owing to continual fluctuation in the course of the river. 1:50,000-scale retriangulation stations of Bhakra Dam Project Survey are shown as tertiary bench-marks throughout the sheet.

COMPILED INDEX

A. Surveyed during 1952-53. Updated for major details during 2005-06.

Projection - UTM Datum - WGS 84

Magnetic Variation from True North about 1° East in 2000. (Assuming an annual change of 0.01°)

1:50,000

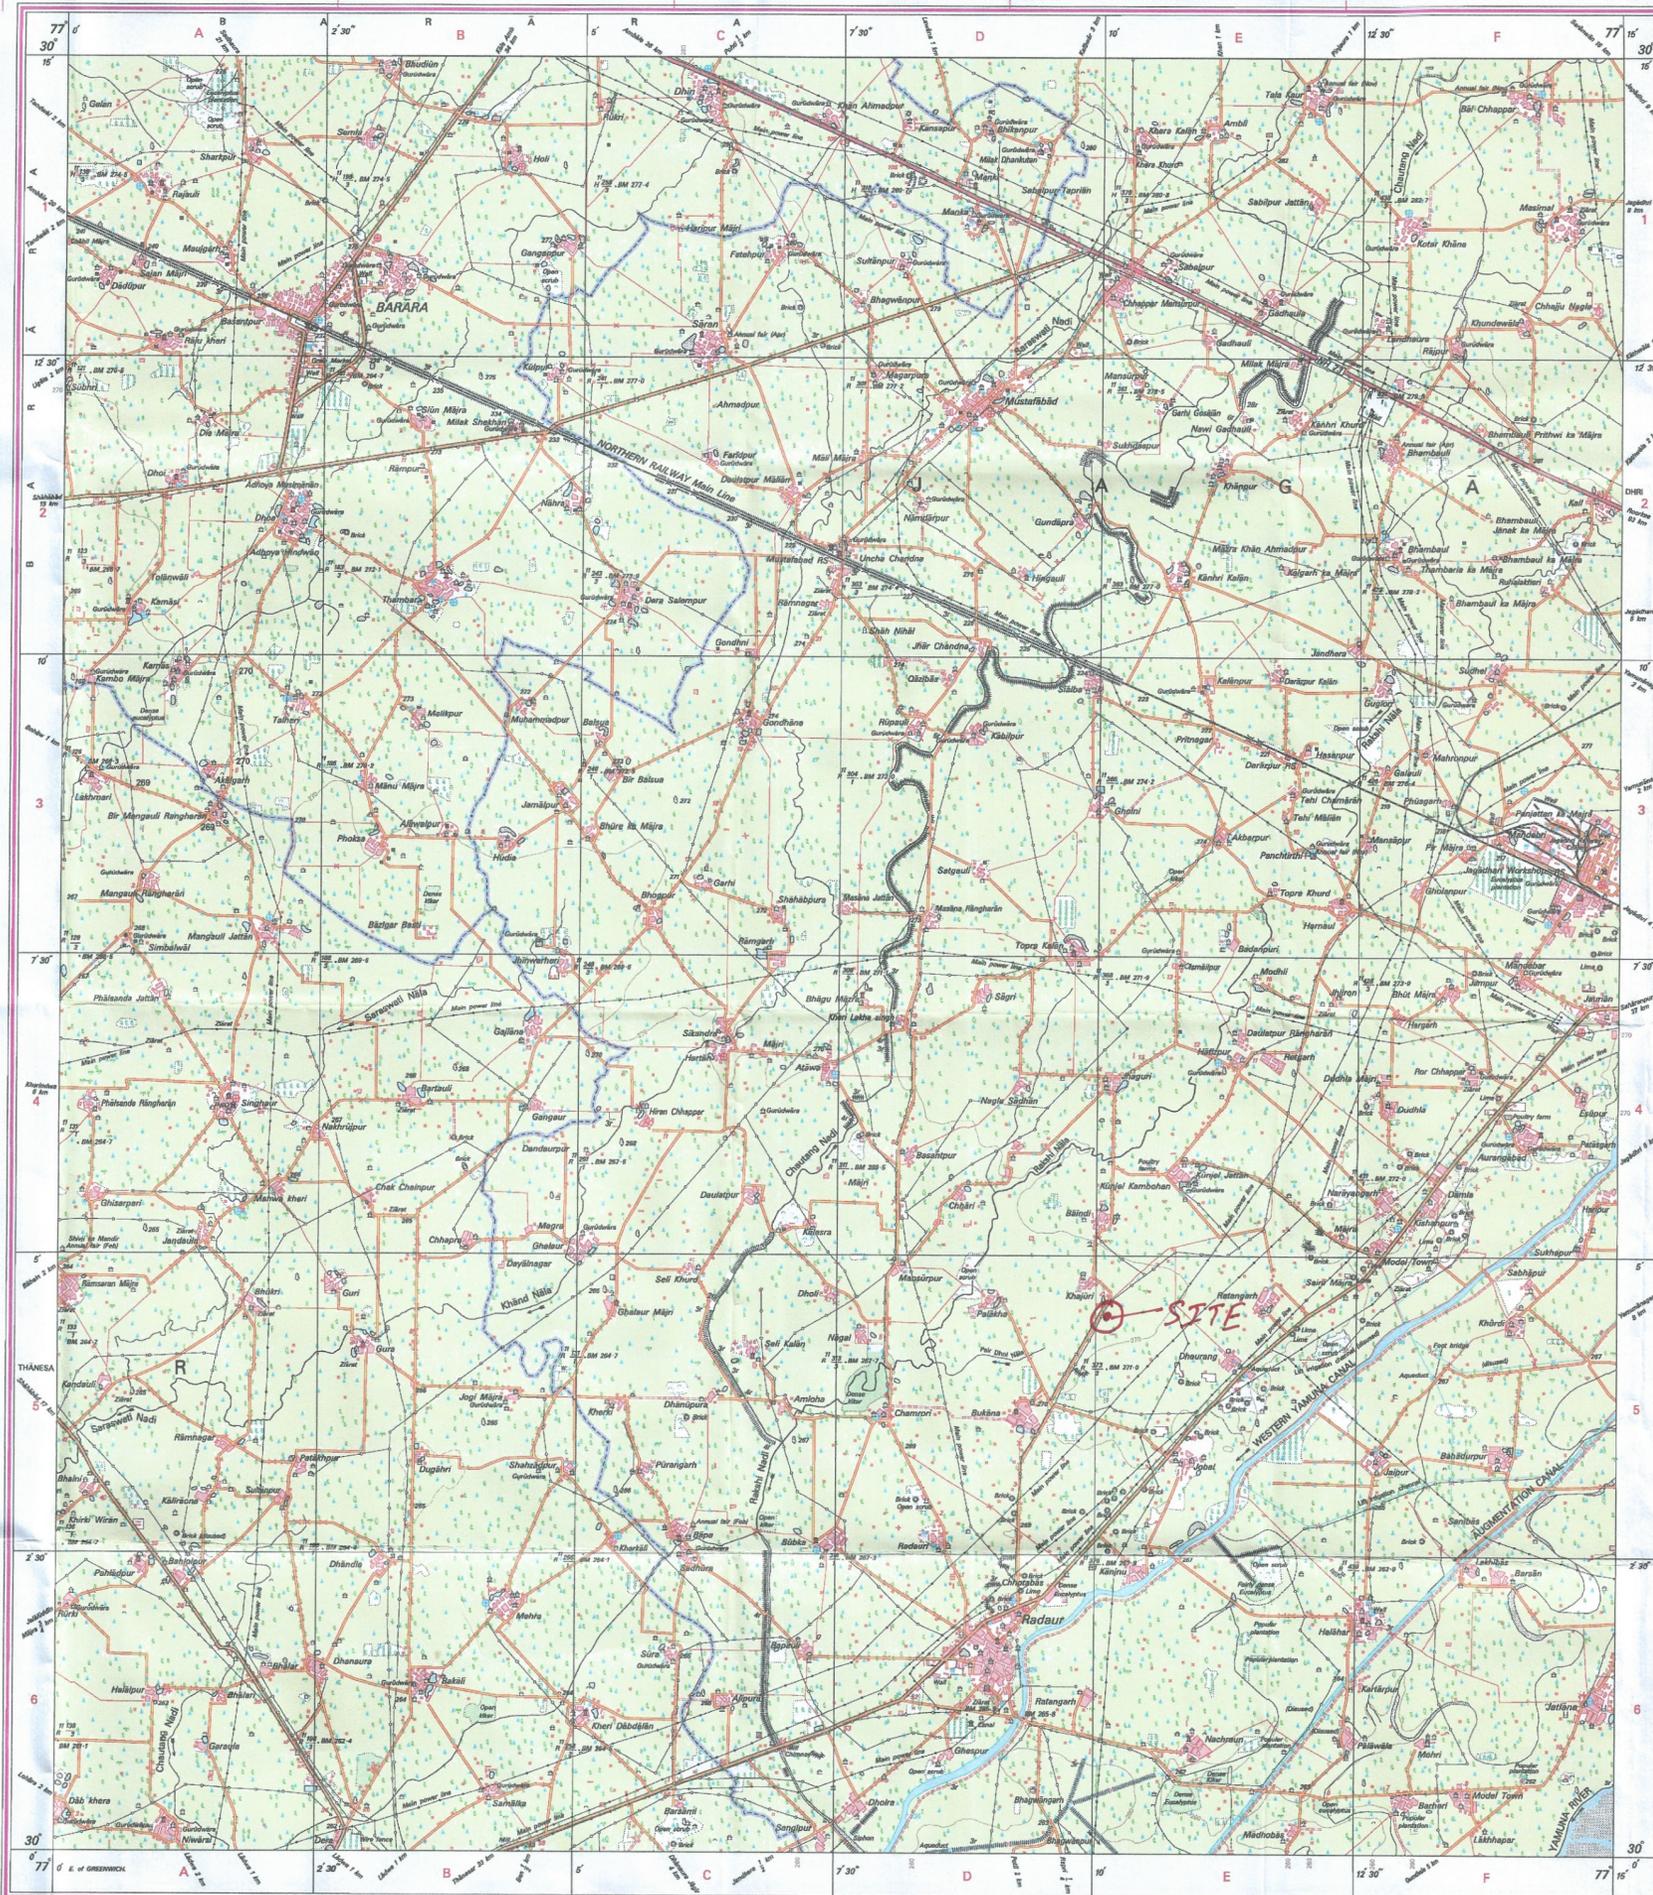

CONTOUR INTERVAL 10 METRES
