## **Recommendation Report**

Sub:- Electrification of Kayattuva & Thodakkayam Colonies –  
Proposal from KSEB - reg.

The propped project site for underground cabling to enable electricity connection from Kayattuva to Thodakkayam colonies was inspected by me on 10<sup>th</sup> March 2017. The cable is proposed to be drawn underground through an existing road passing through 1983 Teak Plantation. There aren't any trees to be felled for the execution of the project.

The area is 0.006 Ha and the project will not in any manner hinder the movement of wildlife through the area. It is also not detrimental to the ecology.

I, therefore, recommend implementing the project.
