

## SOIL SUITABLE CERTIFICATE

It is to certify that, I have inspected the site in Compt. No. 520 of Rajapet CA block of Wanaparthy Range for treatment under compensatory afforestation.

The site consists of hillock and boulder intermittent with soil patches which are eroded and the top soil is lost. Out of 0.623 Ha the area suitability for BHA planting/Gap planting in 0.623 Ha by trench cum pit method (Barren Hill Afforestation), with species like Azadirachta Indica (Vepa), Cassia Fistula (Rela), Butea monosperma (Moduga), Albizia amara (Narlinga), etc... The area will be treated with Protection & SMC works.
