Proposed Project

REFERENCES

Notes: Heights are in metres and above Indian mean sea level. Contours are approximate. A relative height, e.g., 50, represents the approximate height, in metres, between the top and bottom of a steep slope. The kilometre numbers along railways, roads and canals are shown in slant type, e.g., 12, whereas kilometre numbers are shown in upright type, e.g., 12. Cart tracks and unmetalled roads in this sheet are generally not shown in dry season. Permission to use those along canals is required from the Irrigation authorities. The common boundaries within Reserved and Protected Forests have not been shown for want of reliable information. A relative height, e.g., 50, marked along canal, indicates the height of the top of the canal embankment above the adjacent country. Tanks, shown dry in this area, usually contain water from July to December. Wells and tube wells are numerous throughout the sheet; only the important ones have been shown. The state boundary between Bihar and Uttar Pradesh States has been surveyed as pointed out by the local officials on the ground but has not been verified by the Government concerned.

COMPLETION INDEX

A. Modern Survey 1975-76. Updated for major details during 2005-06 and administrative boundaries updated during 2007-08.

Projection - UTM Datum - WGS 84

Magnetic Variation from True North about 1° West in 2005.

(Decreasing by about 1" annually).

Scale 1:50,000

CONTOUR INTERVAL 10 METRES
