NOTES

Heights are in metres and above Indian mean sea level.

Contours are approximate.

Tanks, shown dry, in this area usually contain water from July to March.

A relative height e.g. 2.3r marked along a canal indicates the height of the top of the canal embankment above the adjacent country.

Tube-wells and wells are numerous throughout the sheet, only the important ones have been shown.

Unmetalled roads and cart-tracks in this sheet are generally not shown in dry season. Permission to use those along canals is required from the irrigation authorities.

The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.

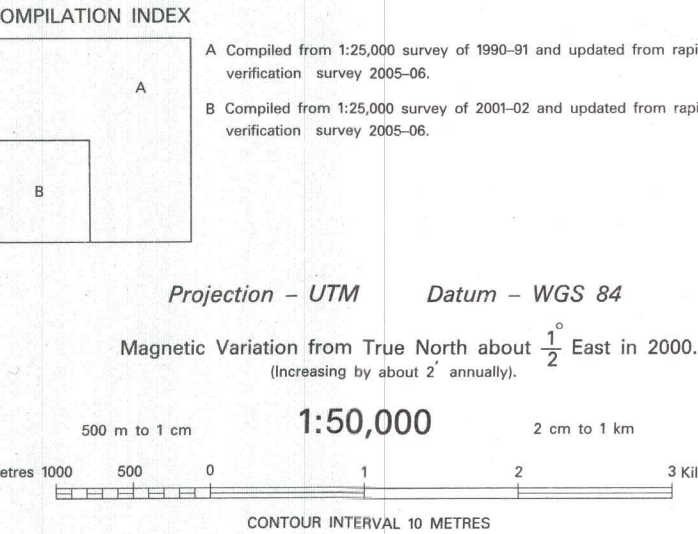

The course of Yamuna and Hindan Rivers is liable to change owing to continual fluctuations.

The state boundaries between Delhi & Haryana, Delhi & Uttar Pradesh and Haryana & Uttar Pradesh States have been surveyed as pointed out by the local officials on the ground but have not been verified by the Governments concerned.

Important buildings are shown in black with names.

The tahsil boundaries in Delhi state have not been shown in this sheet for want of reliable information.

Distance shown along canals are in miles.

Reproduction in whole or part by any means is prohibited without the written permission of Survey of India, the National Mapping Agency.
