BOOK 6

CONVENTIONAL SYMBOLS

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to understand the preferences and behaviors of potential customers.

2. Once a market need is identified, the next step is to develop a concept. This involves brainstorming ideas and creating a rough sketch of the product.

3. The third step is to create a prototype. This involves building a physical model of the product to test its functionality and appearance.

4. The fourth step is to conduct a feasibility study. This involves evaluating the technical, financial, and market viability of the product.

5. The fifth step is to develop a business plan. This involves outlining the marketing, sales, and distribution strategies for the product.

6. The sixth step is to secure funding. This involves seeking investment from venture capitalists, angel investors, or crowdfunding platforms.

7. The seventh step is to manufacture the product. This involves sourcing materials, hiring a manufacturer, and overseeing the production process.

8. The eighth step is to launch the product. This involves creating a marketing campaign, setting up distribution channels, and officially introducing the product to the market.

9. The ninth step is to monitor and evaluate the product's performance. This involves tracking sales, customer feedback, and market trends to make necessary adjustments.

10. The tenth step is to iterate and improve the product. This involves incorporating customer feedback and market insights to refine the product and enhance its competitiveness.
