

To, whom it may concern,

The project we are undertaking is not a part of forest land but comes under municipal corporation of Panchkula and the only the connecting road from our project land to the road constructed already falls in the Forest Land. The distance from our project land to the connecting road is approximately 10 feet or 3.4 metres and we require a strip only 20 feet wide. So, our project is not in forest land but only the road strip which will provide connectivity falls in the forest zone.
