NOTES

Local distance records are 3000 feet apart and cover existing 3000 stone is shown.
 Stone closer dry is the one actually contain some both July and March.
 Tolerances are maximum throughout the study, only the important ones have been shown.
 A relative height Δ represent the approximate height. It varies, between the top and bottom of a
 range stone.
 Permission to use sub-sections and unmarked ranges along stones is required from the Ferguson authorities.
 A relative height Δ , marked along a canal, indicates the height of the top of the canal underneath
 above the adjacent country.
 The informative boundaries and ranges have been brought up-to-date to 2007

COMPILED BY J. H. HARRIS

A	A. Synopses dating 1895-97 B. Compiled from 1,25,000 survey, 2000-08	} digitized by eGangotri during 2014-15
