Point No.	Reply
1	It pertains to forest department.
2	Revised DSS analysis is attached and uploaded online.
3	A Suitable cross drainage structure has been proposed based on a hydrological survey of the area. There will be no obstruction to the natural drainage of the area. Road side drainage is also proposed in a manner so that the surface water is led to the low points and is drained through the C.D, structure, retaining wall, crate work. It is further conveyed that a kachha road already has been in use for about 10 years and till now no wildlife casualty or ecological damage has been reported due to vehicular movement.
4	It pertains to forest department.
5	To protect soil erosion and moisture conservation the user agency has proposed retaining walls and wire crate walls as per Annexure-I A amounting to Rs. 165.96 Lakhs and for the cross drainage, the 30 Nos. of various RCC Pipe culvert as per Annexure F-7 costing 116.22 Lakhs have been proposed for the smooth flow of water. The above described provisions will lead to no ecological damage and there will be no hindrance to the movement of the wildlife. However, the said area does not fall under the wildlife sanctuary even then for the safety of the wildlife and ecological protection the agency will put

	signboards and will make speed breakers as a precautionary measure. It is also conveyed that the bad shape of the existing kuchha road during the rainy season has led to medical emergencies as vehicular movement almost become impossible and in one case it led to human casualty also. The material carriage cost increases considerably during rainy season and cost of items doubles as these reach the consumers.

पानी की निकासी हेतु नालियाँ बना दे तो बरसात के मौसम में भूमि कटान भी रुक जाएगा और वन्य जीव को भी नुकसान नहीं होगा।

अध्यक्ष महोदय के ध्यान में लाया गया कि 'एक पहल सोसाइटी' ने दिनांक 26-06-2022 को उपमंडलाधिकारी (नागरिक) के माध्यम से माननीय मुख्यमंत्री हिमाचल प्रदेश को एक ज्ञापन दिया था जब उपमंडलाधिकारी (नागरिक) स्वारघाट, खाल टिब्बा के लोगो द्वारा किए जा रहे माननीय मुख्यमंत्री हिमाचल प्रदेश के विरोध में काले झंडे दिखा रहे थे जिस बारे उन्होंने आश्वासन को मानते हुए यह विरोध प्रदर्शन वापिस ले लिया था। 'एक पहल सोसाइटी' के सदस्यों ने कहा कि दिनांक 28-06-2022 को Inspector General of Forest Integrated Regional Office Shimla को जो रोड के सम्बन्ध में 2016 में जो प्रपोजल भेजी गई थी परन्तु उसका जबाब आज तक नहीं मिला।

Hydrological Survey

Hydrological survey is necessary for design of adequate and safe Cross Drainage Structures so that the road water can pass as per natural slope. Hydrological survey of the proposed road is based on the following observations:

- Rainfall Data
- Catchments Area
- Time of Concentration
- Existing Cross Drainage Structures.

Rainfall Data

Rainfall Data as applicable for the project road were collected with maximum rainfall occurring in the months of {July-August, Annual 900-1000 mm }

Catchment Area

The Catchments area is calculated by gathering local information and topographical survey data as it was not possible to calculate from topographical sheets due to their unavailability.

$$500 \times 0.600 = 0.900 \text{ Sqkm}$$

Time of Concentration

Time of concentration (t_c) in hours is calculated from the formula of $(0.87 \times L/H)^{0.385}$, where L is distance from the critical point to the structure site in km and H is the difference in elevation between the critical point and the structure site in meters. NO Such Nallah Exists on this road and only road side drain water will be disposed of on safer locations.

Introduction

Objectives of Pradhan Mantri Gram Sadak Yojna (PMGSY)

Rural Road connectivity is a key component of rural development by promoting access to economic and social services and thereby generating increased agricultural incomes and productive employment opportunities. It is also a key ingredient in ensuring poverty reduction.

It was against this background of poor connectivity that the Prime Minister announced in 2000, a massive rural roads program. The Prime Minister's Rural Road Program (Pradhan Mantri Gram Sadak Yojana, PMGSY) set a target of:

- Achieving all-weather road access to every village/habitation with a population greater than 1000 by 2003.
- Providing all-weather road access to all villages/habitations of population greater than 500 people [250 in case of hill States (North-Eastern states, Sikkim, Himachal Pradesh, Jammu & Kashmir and Uttaranchal), the desert areas and tribal areas] by the end of the Tenth Five Year Plan, i.e., 2007

All Weather Road

{ These are the road in which the traffic remains continue during the rainy season. }

Core Network

The rural road network required for providing the 'basic access' to all villages/ habitations is termed as the Core Network. Basic access is defined as one all-weather road access from each village/ habitation to the nearby Market Centre or Rural Business Hub (RBH) and essential social and economic services.

A Core Network comprises of Through Routes and Link Routes. Through routes are the ones which collect traffic from several link roads or a long chain of habitations and lead it to a market centre or a higher category road, i.e. the District Roads or the State or National Highways. Link Routes are the roads connecting a single habitation or a group of habitations to Through Roads or District Roads leading to Market Centres. Link Routes generally have dead ends terminating on habitations, while Through Routes arise from the confluence of two or more Link Routes and emerge on to a major road or to a Market Centre.

The Core Network may not represent the most convenient or economic route for all purposes. However, since studies show 85-90% of rural trips are to market centres, the Core Network is likely to be a cost-effective conceptual frame work for investment and management purposes, particularly in the context of scarce resources.

The Sub-project road (SNB) to {Khal Tiba } is a link road with Code { 1-171} in Sadar Bilaspur } block of {Bilaspur } District. This road directly connects the habitations of {Kha Tiba } with populations of {250} respectively. Thus this link road serves the total population of {250}.

1.4 Geography

{ The road is constructed in Rolling Terrain of District Bilaspur in HP State and the alignment of the road passes through the agriculture and garssy land .

1.5 Climatic Condition

{ The minimum temperature of the area falls to 4°C and Maximum upto 42 °C . The rain fall varies in between 1000 to 1100 mm per annum. }

1.6 The Sub-Project Road

The road passes through plain/rolling/hilly terrain {Rolling Terrain }.

{ The road geometrics has been followed as per Standard.
