## CLARIFICATION ON POINT C (ii)(a)

Clarification regarding the letter of your office dated 12-10-2020 at No. KFD/HOFF/A5-2(GFL)/49/2020FC with reference to Item in part I/C (ii)(a).

In the application submitted to the department seeking permission to undertake ordinary building stone quarry activity in forest Sy. No. 61 of Khurse village in Sirsi taluk of Uttara Kannada district, we have mentioned that the approach road to be formed in forest land admeasures 360 meter length and 7.5 meter width and the same is shown in straight line in KML file. The total area required for the said purpose is measuring 0.27 hectare. The proposed road area is in a down gradient in the middle portion and at the end in the upper gradient. A river is also flowing in the middle of proposed portion of the road area. Nearby the proposed road a zig-zag narrow pathway is situated which also crosses the river. If permanent road is formed in the existing pathway place, the length of the road will be higher than the proposed length and which will require more forest land. Considering all these facts and the topographical situation the proposed road is shown in a straight line in KML file. If permission is accorded to form the road as mentioned in the file, there will be no higher damage to the forest trees and soil conservation.
