

**NAME OF WORK / PROPOSAL:- CONSTRUCTION OF KENDRIYA VIDYALAYA IN DHARAMPUR, DISTRICT MANDI.**

**File No.- FP/HP/SCH/49067/2020**

**Date of Proposal :- 24.08.2020**

**Preliminary Estimate of Muck Generation and Disposal**

The proposed project site as per work proposal is a semi hilly site. Muck generation due to excavation work in the proposed project is estimated at 375-400 cubic meters (Appx.) at all. The muck that has been estimated to be generated is in a very meagre scale. Therefore, no separate dumping site is required for the disposal of estimated muck, rather it would be utilised in aggradation of down fillings, plaining some portion of the project site and to fill other hazardous downs and filling a side of retaining walls. Muck generation and its disposal shall be done in the same project site and as such it is not a major considerable issue in view of geographical conditions of the site.

  
Sub Divisional Magistrate
