

Roads,metalled and/or to importance: distance stone
 - unmetalled: do to bridge

Cart-track - Piers-track and pass Foot-path with Bridges

Bridges - with-piers-without Causeway Ford or Ferry

Streams - with track in bed,unflooded

Dams - masonry or earthen

River banks - shelving steep 30.6metres over 6 metres
 - dry with water channel; with island & rocks tidal river

Submerged rocks. Shoal. Swamp. Reeds

Wells: lined unlined Tub well. Spring Tanks: perennial dry
 Embankments: road or rail bank. Broken ground

Railways: bridges: single with double track or other constraints

Other roads: bridges: single with double track or other constraints

Mineral line or tramway. Telegraph line. Cutting with tunnel

Contours with sub-factors. Rocky slopes. Cliffs

Send features (if possible) and done (if possible) shifting done

HEIGHTS & CONTOURS IN METRES

CONTOUR INTERVAL 20 METRES

Water features are shown in blue where they generally contain water.

Cultivated areas are coloured yellow.

*The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribands.

Contours are approximate. .
A relative height, δr , represents the approximate height, in metres, between top and bottom of a steep slope.
Wooded areas are coloured green. Scatter trees and other vegetation are in green, but prominent surveyed trees are in black.

* Not applicable

This sheet has been systematically verified and contoured in the field during 1959-60 on blue prints of detail prepared by rigorous air survey from 1-6-inch vertical photographs taken in May 1958 and combined by the slotted template method.

A relative height, e.g., 30r, against a well in blue, indicates its total depth in metres.

Cart-tracks in this sheet are generally motorable (four-wheel drive).

Distance stones along railways, roads and cart-tracks are in miles.

Tanks, shown dry in this area, usually contain water from July to November.

Limits of cultivation are variable and dependent on rainfall
