

JUSTIFICATION REPORT FOR LOCATING THE PROJECT IN FOREST AREA

The proposed forest Khasmal land is located along Rinchenpong-Mangalbaria-Jorethang SPWD Road. It is 1.5 KM (approx.) away from Rinchenpong Bazaar which is found suitable for construction of Resource Recovery Centre. With the view to make the Country clean and hygienic, the Government of India launched the "SWACHH BHARAT MISSION (GRAMIN)" which is a Flagship Rural Sanitation Programme under Solid Liquid Resource Management (SLRM). The SLRM targeted to make the Country Swachh in all respect and Solid Liquid Resource Management (SLRM) initiatives are the integral part of this programme.

Hence, in order to initiate the Project and for sustainability of cleanliness in the villages, the Govt. has directed to construct a Resource Recovery Centre in all the Blocks under Block Administrative Centre with DPR, which has been approved by the Government. So, as per the letters followed by Guidelines, Circulars issued by the RM & DD and Forest Envnt. & WM Deptt, Government of Sikkim, all the BACs have been advised to identify a suitable Forest land for the purpose of construction of RRC, in case private lands are not available. According to which, the BAC made several efforts to identify private land for the said purpose within the Block, but unfortunately we could not identify the private land. Subsequently, when we approached the Forest Env.& WM Deptt. for grant of land for the said purpose, a plot of land at Sangadorjee Khasmal was identified and after conducting joint inspection by the BAC Officials with Revenue Supervisor/LR & DMD and the Forest Deptt. a plot of land bearing Plot No.378/A measuring area .1010 Hect. under Forest Khasmal at Sangadorjee block, Rinchenpong, West Sikkim has been found suitable for the said purpose since the proposed site is non-occupation of the tribes and far from human habitation.
