

## Recommendation of Divisional Forest Officer

The proposed Water Supply Scheme in Paingottoor Grama Panchayath under funding KIIFB is to provide drinking water for people of Paingottoor Grama Panchayath by constructing a Water Tank and Water Treatment Plant in Kaliyar Range of Kothamangalam Division. The extent of forest land to be diverted is 0.2428 ha. The people in this area belongs to poor community. Most of them are from agricultural sector. Majority of them are of BPL category. The project will enhance the living standard of the poor village community since scarcity of water is experienced in the Panchayath and no other alternate and suitable locations are available for the project in private lands coming under the panchayath. Also the proposed scheme will not hamper any wildlife habitat. Hence the proposal is recommended for approval.

  
Divisional Forest Officer,  
Kothamangalam
