

## Recommendations of Deputy Conservator of Forest Haveri Division, Haveri

After proper field inspections it was found that the forest area proposed for diversion by user agency is site specific and there is no alternative way to construct the aqueduct. The construction will cause least damage to flora and fauna of the locality., Thus , an area of 0.5404 ha in F.Sy. Nos.-151, 154, 155 and 181 in Airani village of Ranebennur taluk, Haveri district is hereby recommended for diversion.
